Gooding Jr.,2025-04-21 Despite Hollywood s recent efforts to appeal to more racially diverse audiences mainstream movies routinely present a limited view of non Whites generally and Black women specifically in stark contrast to the broadly developed spectrum of White characters Black women characters are frequently rendered invisible and even in films featuring their image Black women characters too often fall prey to historically stereotypical patterns These consistently marginalized Black female images serve to reflect and reinforce messages of racial imbalance distributed worldwide In Double Crossed Black Female Intersectionality in Hollywood author Frederick W Gooding Jr chronicles the Black female experience through the lens of Hollywood Gooding begins by contextualizing the origins of early Black female imagery on screen largely restricted to the domestic mammy figure then traces how these images have shifted over time Through close readings of such films as Gone with the Wind Bringing Down the House The Princess and the Frog and The Help as well as case studies looking at Oprah Winfrey and Shonda Rhimes Gooding considers not only the image the Black woman creates but also the shadow she casts This volume demonstrates the historical economic and social consequences of Hollywood s distorted representation of Black women on screen and in real life Against Inequality Tom Malleon,2023 In

an era of remarkable wealth idolatry Tom Malleson investigates the ethical justifications of wealth inequality taking the radical position that we should abolish the billionaires Stark inequality is a problem the world over but it has been worsening over the past thirty years particularly in rich economically developed countries To acquire the same amount of wealth as Elon Musk the average American worker would have to work for more than four and a half million years Is this inequality morally acceptable and is it feasible to actually reduce inequality in the real world In *Against Inequality* Tom Malleson makes the case for rejecting meritocracy presenting a strong defense against the claim that individuals deserve their wealth Malleson argues that people especially rich people do not morally deserve the bulk of their income because it does not by and large come from anything the specific individual does but is largely due to the vast understructure of other people's labor in addition to their lucky possession of bodily talents and efforts Furthermore the book brings to light extensive historical and comparative evidence to show that raising taxes on both income and wealth is practically feasible and that the costs of doing so are far outweighed by the truly enormous benefits that such taxes could bring in terms of environmental sustainability democratic equality equal opportunity and reduced racism and xenophobia Unlike previous books on inequality *Against Inequality* focuses on the superrich arguing that they have far too much a world with billionaires alongside severe deprivation is a world without justice Malleson's argument is not that billionaires are individually evil but that a society that allows the existence of the superrich is structurally immoral In an era of remarkable wealth idolatry *Against Inequality* takes the radical position that we should abolish the billionaires
