Algebra Structure Sense Development amongst Diverse Learners Teresa Rojano, 2022-06-07 This volume emphasizes the role of effective curriculum design teaching materials and pedagogy to foster algebra structure sense at different educational levels Positing algebra structure sense as fundamental to developing students broader mathematical maturity and advanced thinking this text reviews conceptual historical cognitive and semiotic factors which influence the acquisition of algebra structure sense It provides empirical evidence to demonstrate the feasibility of linking algebra structure sense to technological tools and promoting it amongst diverse learners Didactic approaches include the use of adaptive digital environments gamification diagnostic and monitoring tools as well as exercises and algebraic sequences of varied complexity Advocating for a focus on both intuitive and formal knowledge this volume will be of interest to students scholars and researchers with an interest in educational research as well as mathematics education and numeracy **Algebra**

Computer Item Generator Book 1998 Copyright, 1998 **Early Algebra** Carolyn Kieran, Jeong Suk Pang, Deborah Schifter, Swee Fong Ng, 2016-07-11 This survey of the state of the art on research in early algebra traces the evolution of a relatively new field of research and teaching practice With its focus on the younger student aged from about 6 years up to 12 years this volume reveals the nature of the research that has been carried out in early algebra and how it has shaped the growth of the field The survey in presenting examples drawn from the steadily growing research base highlights both the nature of algebraic thinking and the ways in which this thinking is being developed in the primary and early middle school student Mathematical relations patterns and arithmetical structures lie at the heart of early algebraic activity with processes such as noticing conjecturing generalizing representing justifying and communicating being central to students engagement
