Money Pits: British Mining Companies in the Californian and Australian Gold Rushes of the 1850s John Woodland, 2016-04-15 Between 1849 and 1853 shares in nearly 120 public companies to exploit the booming goldfields of California and Australia were offered to the British public The companies were collectively capitalised at over 15 million but in the end only some 1 75 million was actually raised between 42 of them with only one company surviving what the newspapers of the day described as a gold bubble This book provides an overview of the entire bubble event its antecedents and its outcomes A number of researchers have investigated an earlier boom in the mid 1820s to reopen gold and silver mines in Latin America and several have studied individual company operations of that period This is the first detailed investigation of the British gold bubble companies of the 1850s and their involvement in the almost simultaneous gold rushes on both sides of the Pacific Ocean **Publications: Mining methods in Australia and adjacent territories**, 1953 **An**

Archaeology of Australia Since 1788 Susan Lawrence, Peter Davies, 2010-10-21 This volume provides an important new synthesis of archaeological work carried out in Australia on the post contact period It draws on dozens of case studies from a wide geographical and temporal span to explore the daily life of Australians in settings such as convict stations goldfields whalers camps farms pastoral estates and urban neighbourhoods The different conditions experienced by various groups of people are described in detail including rich and poor convicts and their superiors Aboriginal people women children and migrant groups The social themes of gender class ethnicity status and identity inform every chapter demonstrating that these are vital parts of human experience and cannot be separated from archaeologies of industry urbanization and culture contact

The book engages with a wide range of contemporary discussions and debates within Australian history and the international discipline of historical archaeology. The colonization of Australia was part of the international expansion of European hegemony in the eighteenth and nineteenth century. The material discussed here is thus fundamentally part of the global processes of colonization and the creation of settler societies, the industrial revolution, the development of mass consumer culture, and the emergence of national identities. Drawing out these themes and integrating them with the analysis of archaeological materials highlights the vital relevance of archaeology in modern society.

Geology of the Mineral Deposits of Australia and Papua New Guinea Francis Everard Hughes, 1990

The Oxford Handbook of Industrial Archaeology Eleanor Casella, Michael Nevell, Hanna Steyne, 2022-05-12

Representing the first substantial English language text on Industrial Archaeology in a decade, this handbook comes at a time when the global impact of industrialization is being reassessed in terms of its legacy of climate change, mechanization, urbanization, the forced migration of peoples, and labour relations. Critical debates around the beginning of a new geological era, The Anthropocene, have emerged over the last decade. This approach interrogates the widespread exploitation of natural resources that forged industrialization from its early emergence in 18th century northern Europe to its contemporary ubiquity, environmental impacts, and social legacy within our globalized world. Through a broad international and multi-period set of chapters, this volume explores the complex origins, processes, and development of industrialization through both its physical remains and human consequences, both the good and the bad. It provides a diverse material framework for understanding our modern world from its industrial origins through its future paths in the 21st century.
