1. I would ensure that the key is opened when the circuit is not in use to avoid the cell being used up.
2. I would ensure that the electrical wires are tightly connected
3. I would ensure that I take note of the zero error in the pointer instruments to avoid systematic error
4. I would ensure that I take pointer readings within the vertical eye level to avoid parallax
5. I used short connecting wires to ensure that the required energy to drive the electrical charges was not used up in overcoming the resistance of the wire.

100 100 PHYSICS PRACTICALS - ALT A

The student is provided with a metre rule, a weight hanger, slotted masses, M , a weighing balance and a knife edge.

Use the steps given as a guide to perform the experiment.

- (i) Using the weighing balance, determine and record the mass, M_0 , of the weight hanger.
- (ii) Determine and record the mass, m , of the weight hanger.
- (iii) Suspend the metre rule horizontally on the knife edge. Adjust the point of suspension where it balances horizontally.
- (iv) Record the distance, $d = AG$.
- (v) Suspend the weight hanger securely at a point, P , on the metre rule such that $AP = 5 \text{ cm}$. Keep the hanger at this point throughout the experiment.
- (vi) Add a mass, $M = 20 \text{ g}$ to the hanger, adjust the knife edge to a point on the metre rule such that it balances horizontally as shown in the diagram. Determine and record the distance $x = AK$.
- (vii) Record M and evaluate $y = (x - 5)$, $x = (d - x)$ and $v = \frac{x}{y}$.
- (ix) Repeat the experiment for $M = 40 \text{ g}$, 60 g , 80 g and 100 g . In each case, evaluate y , x and v .
- (x) Tabulate the results.
- (xi) Plot a graph with M on the vertical axis and v on the horizontal axis. Both axes must start from the origin $(0,0)$.
- (xii) Determine the slope, s , of the graph.
- (xiii) Determine the intercept, c , on the vertical axis.
- (xiv) State two precautions taken to ensure accurate results.

- b) (i) Under what condition is an object said to be in a *stable equilibrium*?
- (ii) A uniform beam of weight 50 N has a body of weight 100 N hung from one end of it. If the beam is 12 m long, determine the distance of support from a 100 N body for it to balance horizontally.

Handbook of Alternative Theories of Economic Development Erik S. Reinert, Jayati Ghosh, Rainer Kattel, 2016-09-28

The Handbook of Alternative Theories of Economic Development explores the theories and approaches which over a prolonged period of time have existed as viable alternatives to today's mainstream and neo-classical tenets. With a total of 40 specially commissioned chapters written by the foremost authorities in their respective fields, this volume represents a landmark in the field of economic development. It elucidates the richness of the alternative and sometimes misunderstood ideas which in different historical contexts have proved to be vital to the improvement of the human condition. The subject matter is approached from several complementary perspectives. From a historical angle, the Handbook charts the mercantilist and cameralist theories that emerged from the Renaissance and developed further during the Enlightenment. From a geographical angle, it includes chapters on African, Chinese, Indian, and Muslim approaches to economic development. Different schools are also explored and discussed, including nineteenth-century US development theory, Marxist, Schumpeterian, Latin American structuralism, regulation theory, and world systems theories of development. In addition, the Handbook has chapters on important events and institutions, including The League of Nations, The Havana Charter, and UNCTAD, as well as on particularly influential development economists. Contemporary topics such as the role of finance, feminism, the agrarian issue, and ecology and the environment are also covered in depth. This comprehensive Handbook offers an unrivalled review and analysis of alternative and heterodox theories of economic development. It should be read by all serious scholars, teachers, and students of development studies, and indeed anyone interested in alternatives to development orthodoxy.

The Neglect of Experiment Allan Franklin, 1989-09-29

What role have experiments played and should they play in physics? How does one come to believe rationally in experimental results? *The Neglect of Experiment* attempts to provide answers to both of these questions. Professor Franklin's approach combines the detailed study of four episodes in the history of twentieth-century physics with an examination of some of the philosophical issues involved. The episodes are the discovery of parity nonconservation or the violation of mirror symmetry in the 1950s, the nondiscovery of parity nonconservation in the 1930s when the results of experiments indicated at least in retrospect the symmetry violation, but the significance of those results was not realized, the discovery and acceptance of CP combined parity charge conjugations, particle-antiparticle symmetry, and Millikan's oil drop experiment. Franklin examines the various roles

that experiment plays including its role in deciding between competing theories confirming theories and calling for new theories The author argues that one can provide a philosophical justification for these roles He contends that if experiment plays such important roles then one must have good reason to believe in experimental results He then deals with several problems concerning such results including the epistemology of experiment how one comes to believe rationally in experimental results the question of the influence of theoretical presuppositions on results and the problem of scientific fraud This original and important contribution to the study of the philosophy of experimental science is an outgrowth of many years of research Franklin brings to this work more than a decade of experience as an experimental high energy physicist along with his significant contributions to the history and philosophy of science *Alternative Energy For Dummies* Rik DeGunther,2009-04-13 The myths and facts about alternative fuels and how they impact our lives As the price of energy continues to soar so too has the demand for alternative energy But there is no clear winner in the race to replace fossil fuels *Alternative Energy For Dummies* explores the current fossil fuel conundrum and society's growing need for more and more energy Cutting through the competing claims this book offers a multifaceted examination of alternative energy including solar wind nuclear biomass geothermal biofuel and other sources Each alternative scenario is compared to current fossil fuel intensive practices in the scientific environmental social political and economic realms Readers also gain insight into the future of energy production **Local Examinations** University of Cambridge,1890 **Theoretical Mechanics** John Edward Taylor,1897 **Higher Local Examinations** University of Cambridge,1886 *Elementary Geology* Charles Bird,1898 **Quantum Theory** Charis Anastopoulos,2023-08-31 The ideal text for a two semester graduate course on quantum mechanics Fresh comprehensive and clear it strikes the optimal balance between covering traditional material and exploring contemporary topics Focusing on the probabilistic structure of quantum mechanics and the central role of symmetries to unify principles this textbook guides readers through the logical development of the theory Students will also learn about the more exciting and controversial aspects of quantum theory with discussions on past interpretations and the current debates on cutting edge concepts such as quantum information and entanglement open quantum systems and quantum measurement theory The book has two types of content Type A material is more elementary and is fully self contained functioning like a separate book within the book while Type B content is at the level of a graduate course Requiring minimal physics background this textbook is appropriate for mathematics and engineering students in addition to physicists Introducing cutting edge topics in the field the book features about 150 concept checking questions 300 homework problems and a solutions manual [The Theory of Phenomenological Structuralism](#) Paul C. goes on to synthesize Haitian and Vilokan idealism phenomenology Althusserian structural Marxism quantum mechanics and Ludwig Wittgenstein's notion of language games in order to offer an alternative reading of the structure agency problematic which holds onto the notions of structure duality dualism and the individual's rational ability to choose to account for the constitution of the individual and society in the resource framework of the earth **The Heart of Wisdom Teaching**

Allan Franklin, 1990-05-25 In *Experiment Right or Wrong* Allan Franklin continues his investigation of the history and philosophy of experiment presented in his previous book *The Neglect of Experiment* In this new study Franklin considers the fallibility and corrigibility of experimental results and presents detailed histories of two such episodes 1 the experiment and the development of the theory of weak interactions from Fermi's theory in 1934 to the V A theory of 1957 and 2 atomic parity violation experiments and the Weinberg Salam unified theory of electroweak interactions of the 1970s and 1980s In these episodes Franklin demonstrates not only that experimental results can be wrong but also that theoretical calculations and the comparison between experiment and theory can also be incorrect In the second episode Franklin contrasts his view of an evidence model of science in which questions of theory choice confirmation and refutation are decided on the basis of reliable experimental evidence with that proposed by the social constructivists *Mind, Body, and Consciousness in Society* Paul C.

Mocombe, 2018-12-21 This book explores the nature of learning and development in the philosophy of phenomenological structuralism which represents an effort to resolve the structure agency problematic of the social sciences within structurationist sociological theory Through the analysis and critique of structurationist sociology the book outlines the underlying tenets of this problematic It goes on to synthesize Haitian ontology and epistemology phenomenology Althusserian structural Marxism quantum mechanics and Ludwig Wittgenstein's notion of language games As such it offers an alternative reading of the structure agency problematic which holds on to the notions of structure duality dualism and the individual's rational ability to choose to account for the constitution of the individual and society in and as the resource framework of the earth In the final analysis the study outlines the implications for this social ontology in the domain of learning and development It utilizes two case studies black America and Haiti to highlight its conclusions that learning and development in this phenomenological structuralism are both Vygotskyian and Chomskyian A synopsis of the book by Paul can be seen here https://youtu.be/2A_OCxQeUW4 *Report of the Commissioners ...* Great Britain.
