Environmental Impact Assessment A.G. Colombo, 2012-12-06. The Joint Research Centre of the European Communities and in particular the Institute for Systems Engineering and Informatics (ISEI) at Ispra have well established competences in risk analysis, uncertainty analysis and statistical data treatment. More recently, work on Environmental Impact Assessment (EIA) particularly on environmental indicators and indices and on a system engineering approach to EIA has started. This approach attempts to move towards unified procedures to investigate normal operation and accidental risks. These are problems concerned within both the EIA Directive 85/337/EEC and the Seveso Directive 82/501/EEC. In May 1990 a Workshop on Indicators and Indices for Environmental Impact Assessment and Risk Analysis was organized at the JRC Ispra. The Proceedings of this Workshop Report EUR 13060 EN 1990 are a reference document in the field. This book is based on the papers presented at the Eurocourse EIA/91 held at the JRC Ispra in the Autumn of 1991. This was the first course on Environmental Impact Assessment given in the JRC's Eurocourse series at Ispra. It was a success because of both the high calibre of the lecturers and the well informed and numerous participants. The work focuses on the broader aspects of EIA, namely legislation, indicators and indices, approaches and techniques, economic and sociological implications.
