Mishkin, 2004 The Money Problem Morgan Ricks, 2016-03-09 An intriguing plan addressing shadow banking regulation and the continuing quest for financial stability Financial Times Years have passed since the world experienced one of the worst financial crises in history and while countless experts have analyzed it many central questions remain unanswered Should money creation be considered a public or private activity or both What do we mean by and want from financial stability What role should regulation play How would we design our monetary institutions if we could start from scratch In The Money Problem Morgan Ricks addresses these questions and more offering a practical yet elegant blueprint for a modernized system of money and banking one that crucially can be accomplished through incremental changes to the United States current system He brings a critical missing dimension to the ongoing debates over financial stability policy arguing that the issue is primarily one of monetary system design The Money Problem offers a way to mitigate the risk of catastrophic panic in the future and it will expand the financial reform conversation in the United States and abroad Highly recommended Choice *Money, Stock Prices and Central Banks* Marcel Wiedmann, 2011-05-05 This contribution applies the cointegrated vector autoregressive CVAR model to analyze the long run behavior and short run dynamics of stock markets across five developed and three emerging economies The main objective is to check whether liquidity conditions play an important role in stock market developments As an innovation liquidity conditions enter the analysis from three angles in the form of a broad monetary aggregate the interbank overnight rate and net capital flows which represent the share of global liquidity that arrives in the respective country A second aim is to understand whether central banks are able to influence the stock market *Macroeconomics, Monetary Economics and Money & Banking Course Materials*, 1981 **1995 Readings to Accompany Mishkin, The Economics of Money, Banking, and Financial Markets** Frederic S.
