Matthews Model of Clinical Reasoning Laurie Knis-Matthews, 2023-11-24 The Matthews Model of Clinical Reasoning MMCR provides occupational therapy practitioners with a systematic approach to develop their clinical reasoning skills during the evaluation and intervention process when collaborating with persons served across multiple practice locations. The three core constructs of person, environment, and occupation lay the foundation for practitioners to compartmentalize information from selected evaluations, determine relevant intervention priorities, implement occupation-based intervention plans, and interpret successful outcomes. This book, influenced by these constructs, the practice framework, and accreditation standards for academic preparedness, provides the reader with the foundational information on how to apply the core constructs using a MMCR systematic approach for evaluation and intervention. Within the chapters are a variety of instructional methods, interviews with practitioners of various levels of experience, and case study examples. Clinical reasoning guidesheets are presented to assist the reader to follow the MMCR clinical reasoning process in terms of evaluation findings, application of frame of reference (FOR), practice models, intervention strategies, and documentation. Occupational therapy students and practitioners will be provided with the foundational skills to systematically think about and apply the steps of the clinical reasoning process, starting with a person's evaluation through the completion of the intervention plan.

Handbook of Occupational Therapy for Adults with Physical Disabilities William Sit, Marsha Neville, 2024-06-01 Handbook of Occupational Therapy for Adults With Physical Disabilities by Drs. William Sit and Marsha Neville provides quick and essential information for occupational therapists that are new to the adult practice setting. This handbook is primarily organized by body system into six sections: Occupational performance as a whole, Central nervous system, Peripheral nervous system, cranial nerves and sensory system, Musculoskeletal system, Cardiovascular/lymphatic/respiratory and integumentary systems, Endocrine/digestive/urinary and reproductive system. At the beginning of each section, you will find a case study based on clinical experience that embodies the chapter subject. Within each section, information is broken down into important aspects of the evaluation process and then followed by the implications of each system on occupational therapy intervention. Handbook of Occupational Therapy for Adults With Physical Disabilities also includes a
