Willermet, Cathy Willermet, Sang-Hee Lee, Sang-hŭi Yi (Professor of anthropology), 2020 A critical assessment of how evidence in biological anthropology is discovered collected and interpreted **The Anthropology of White Supremacy** Aisha M. Beliso-De Jesús, Jemima Pierre, Junaid Rana, 2025-01-28 White supremacy has shaped cultural anthropology from its inception yet the discipline also offers powerful tools for understanding how this corrosive force structures societies around the world *The Anthropology of White Supremacy* explores how this phenomenon works around the globe and within anthropology itself Gathering original essays from a diverse international group of anthropologists this collection illustrates that white supremacy far from being only a fringe belief of white nationalists and fascists is a core mainstream ideology The book includes essays about many countries including Brazil Mexico Nigeria Norway Senegal South Africa and the United States and takes up such topics as American advertising the Belgian Congo South Asian philosophies police cadets U S immigration courts Guantanamo memoirs Palestinian feminism Hollywood paparazzi and how Indigenous anthropologists can counter the damage of settler colonialism The result reveals not only how anthropology can help us to better comprehend white supremacy but also how the discipline can help us begin to dismantle it With contributions by Omolade Adunbi Samar Al Bulushi Aisha M Beliso De Jes s Michael Blakey Mitzi Uehara Carter Subhadra Mitra Channa Celina de S Vanessa Diaz Britt Halvorson Faye Harrison Sarah Ihmoud Anthony R Jerry Darryl Li Krist n Loftsd ttir Christopher Loperena Keisha Khan

Y Perry Jemima Pierre Jean Muteba Rahier Laurence Ralph Renya K Ramirez Junaid Rana Joshua Reno Jonathan Rosa Shalini Shankar and Maria Styve **Biosocial Becomings** Tim Ingold, Gisli Palsson, 2013-06-13 All human life unfolds within a matrix of relations which are at once social and biological Yet the study of humanity has long been divided between often incompatible social and biological approaches Reaching beyond the dualisms of nature and society and of biology and culture this volume proposes a unique and integrated view of anthropology and the life sciences Featuring contributions from leading anthropologists it explores human life as a process of becoming rather than being and demonstrates that humanity is neither given in the nature of our species nor acquired through culture but forged in the process of life itself Combining wide ranging theoretical argument with in depth discussion of material from recent or ongoing field research the chapters demonstrate how contemporary anthropology can move forward in tandem with groundbreaking discoveries in the biological sciences *Racial Segregation and Eugenical Science Between the Wars* Michael L. Blakey, 2025-07-18 This volume examines the rise and decline of racial science and its relationship to the political and social imposition of Jim Crow in the American South a racialized code of laws grounded upon an inherently racist and prejudicial pseudoscience The author argues here that the study of human beings within the emerging 18th and 19th century institutions of Western science was corrupted by the limited social intuitions of its enslaving colonizing and elitist members Western science and White societies plowed forward in continued ideological adherence to a biodeterministic imagination to justify slavery then Jim Crow racial segregation immigration restriction and other deadly and exploitative eugenical solutions of Social Darwinist thought The story is further complexified by the countervailing theories and voices of Black and Jewish intellectuals in the social and biocultural sciences in the 19th and 20th centuries such as Frederick Douglass W E B Du Bois and Montague Cobb These had profound consequences not only for the social sciences but also for the cultural life of Black Americans in the aftermath and afterlife of slavery At the same time even here the author discloses that the racialized dimensions of social science could not be fully exorcised as social science continued to construct soft line racism in that it selectively primitivized darker people and omitted White racism and colonialism from their human story African American social scientists and historians brought White racism and Black modernity to the fore Eugenics had begun to paint marginal White people Jewish and Italian immigrants to the United States as natural inferiors to Nordics or Aryans with devastating consequences in World War II Europe As the War ended the world community began its turn against racism in science and society In constructing this historical and sociological counternarrative the author provides a critical new social history that illuminates a tangled and turgid past for contemporary readers students and researchers with vital insights for anthropology sociology history cultural studies philosophy and American studies *Anthropology and Slavery at the Dawn of White Supremacy* Michael L. Blakey, 2025-07-18 This volume examines biological and cultural data that debunk a primordial basis for racism It tracks the ancient history of all social inequity to agricultural and feudal societies The book then focuses on social and ideological

developments in European societies associated with religious justifications for the enslavement of others The European Enlightenment built upon those prejudices with ideas about nature and acceptable natural causes of unequal social status for people newly classified into biological races Nineteenth century anthropology is critiqued by African diasporic scholars who are the first Americans to argue that nurture rather than nature is responsible for human variation The American Civil War brought slavery nearly to an end but racist science continued to grow as eugenics applied to justify otherwise unjustifiable structures of human inequality such as Jim Crow segregation as though they are morally sound In constructing this historical and sociological counternarrative the author provides a critical new social history that illuminates a tangled and turgid past for contemporary readers students and researchers with vital insights for anthropology sociology history cultural studies philosophy and American studies

The Alternative Introduction to Biological Anthropology Jonathan Marks, 2011 In The Alternative Introduction to Biological Anthropology author Jon Marks presents an innovative framework for thinking about the major issues in the field with fourteen original essays designed to correlate to the core chapters in standard textbooks Each chapter draws on and complements but does not reconstitute except for the sake of clarity the major data and ideas presented in standard texts Marks explores such topics as how we make sense of data about our origins where our modern ideas come from our inability to separate natural facts from cultural facts and values as we try to understand ourselves and the social and political aspects of science as a culturally situated mental activity Features Offers clear intelligent and completely original discussions injected with a sense of humor that will keep students reading Addresses core topics in a way that does not simply mirror what is in the basic textbooks but offers a new spin thereby fostering critical thinking Complements traditional textbooks in biological anthropology and explores connections between biological and general anthropology Provides expert integration of topics coherent narratives and salient examples Utilizes theme statements at the start of each chapter that introduce the breadth of information covered and engage students in the material
