Alvar Aalto A Critical Study Malcolm Quantrill:

Alvar Aalto Malcolm Quantrill,1990-02-01 Alvar Aalto was remarkably inventive in architecture and industrial design Moreover his command of technology was integrated with a humanistic style of building and like Saarinen and Frank Lloyd Wright he sought an organic synthesis of his structures with their surroundings Aalto s success in approaching these ideals may account for the extraordinary spread of his influence on an international scale In this broad study of Aalto s work Malcolm Quantrill assesses its development in terms of two powerful sources the Finnish National Romantic movement and the Modern movement in architecture His critique of Aalto s most significant buildings and furniture designs is complemented by photographs of many stages of their creation from the spontaneity of initial sketches to the completed detail Professor Quantrill first met Alvar and Elissa Aalto at Muuratsalo in June 1953 and he has been studying and photographing Aalto s buildings ever since His book provides striking insights into the work of one of the greatest architects of the century *Finnish Architecture and the Modernist Tradition* Malcolm Quantrill,2012-12-06 This is a unique and comprehensive study of the entire span of Finnish architecture in the 20th century Using comparative critical analysis the author weaves Aalto s contribution into his overview of the evolution of modern Finnish architecture and includes the work of a range of lesser published figures It will be of considerable interest to architects art historians and all those interested in modern Finnish architecture An Analysis of the Work of Finnish Architect Alvar Aalto Laurence Keith Loftin,2005 Aalto is often called the quintessential modernist and at first glance this appears to be rightly so The forms are organic the materials compatible Yet Aalto is also the master of the ambiguous space and mystery in one building one senses history but not exactly why and in another Aalto has combed a curve to create an almost unbearable tensio *Alvar Aalto and Urban Design* Robert Cody,Angela Amoia,2025-10-24 This book provides a fresh look at Alvar Aalto s regional and community planning work particularly the ways in which he incorporated sustainability resiliency energy and health and examines how contemporary architects and planners can learn from this approach for the betterment of 21st century urban design and our future cities The Alvar Aalto Atelier planned and promoted regional development that combined ecological features considered density and offered a framework for informality including flexible adaptable infrastructures with physical plans integrating communities with nature These plans were largely suburban and contained vital lessons on how to deal with sprawl traffic landscape energy labor and industry This book analyzes letters writings and drawings not seen outside the Alvar Aalto Foundation to review alternative ways to examine suburban landscapes and urban typologies through sustainability ecology and use of digital technologies This is an essential read for all those interested in the urban design work of Alvar Aalto Written in an accessible way for those new to the work of Aalto Architecture and Urban Design students of all levels will also find this a helpful guide on ecologically and socially responsible design **The Architecture of Use** Stephen Grabow,Kent Spreckelmeyer,2014-10-03 By analyzing ten examples of buildings that embody the human experience

at an extraordinary level this book clarifies the central importance of the role of function in architecture as a generative force in determining built form Using familiar twentieth century buildings as case studies the authors present these from a new perspective based on their functional design concepts Here Grabow and Spreckelmeyer expand the definition of human use to that of an art form by re evaluating these buildings from an aesthetic and ecological view of function Each building is described from the point of view of a major functional concept or idea of human use which then spreads out and influences the spatial organization built form and structure In doing so each building is presented as an exemplar that reaches beyond the pragmatic concerns of a narrow program and demonstrates how functional concepts can inspire great design evoke archetypal human experience and help us to understand how architecture embodies the deeper purposes and meanings of everyday life

The Oxford Dictionary of Architecture James Stevens Curl,Susan Wilson,2015 With over 6 000 entries this is the most authoritative dictionary of architectural history available

Alvar Aalto and the Future of Architecture Robert Cody,Angela Amoia,2022-09-09 In the contemporary practice of architecture digital design and fabrication are emergent technologies in transforming how architects present a design and form a material strategy that is responsible equitable sustainable resilient and forward looking This book exposes dialogue between history theory design construction technology and sensory experience by means of digital simulations that enhance the assessment and values of our material choices It offers a critical look to the past to inspire the future This new edition looks to Alvar Aalto as the primary protagonist for channeling discussions related to these topics Architects like ALA Shigeru Ban 3XN Peter Zumthor and others also play the role of contemporary guides in this review The work of Aalto and selected contemporary architects along with computer modeling software showcase the importance of comprehensive design Organized by the five Ts of contemporary architectural discourse Typology Topology Tectonics Technic Thermodynamics each chapter is used to connect history through Aalto and develop conversations concerning historical and contemporary models digital simulations ecological and passive active material concerns construction and fabrications and healthy sensorial environments Written for students and academics this book bridges knowledge from academia into practice and vice versa to help architects become better stewards of the environment make healthier and more accountable buildings and find ways to introduce policy to make technology a critical component in thinking about and making architecture

The Greening of Architecture Phillip James Tabb,A. Senem Deviren,2017-03-02 Contemporary architecture and the culture it reflects dependent as it is on fossil fuels has contributed to the cause and necessity of a burgeoning green process that emerged over the past half century This text is the

first to offer a comprehensive critical history and analysis of the greening of architecture through accumulative reduction of negative environmental effects caused by buildings urban designs and settlements Describing the progressive development of green architecture from 1960 to 2010 it illustrates how it is ever evolving and ameliorated through alterations in form technology materials and use and it examines different places worldwide that represent a diversity of cultural and climatic contexts The book is divided into seven chapters with an overview of the environmental issues and the nature of green architecture in response to them followed by an historic perspective of the pioneering evolution of green technology and architectural integration over the past five decades and finally providing the intransigent and culturally pervasive current examples within a wide range of geographic territories The greening of architecture is seen as an evolutionary process that is informed by significant world events climate change environmental theories movements in architecture technological innovations and seminal works in architecture and planning throughout each decade over the past fifty years This time period is bounded on one end by the awareness of environmental problems beginning in the 1960 s the influential texts by Rachel Carson E F Schumacher Buckminster Fuller and Steward Brand and the impact of the OPEC Oil Embargo of 1973 and on the other end the pervasiveness of the necessary greening of architecture that includes systemic reforms in architectural and urban design land use planning transportation agriculture and energy production found in the 2000 s The greening process moves from remediation to holistic models of architecture Geographical landscapes give a global account of the greening process where some examples are parallel and sympathetic and others are in clear contrast to one another with very individuated approaches Certain events like the Rio Summit in 1992 and Kyoto Protocol in 1997 and themes such as the Hannover Principles in 2000 provide a dynamic ideological critique as well as a formal and technical discussion of the embodied and accumulative content of greening principles in architecture *Design* ,1983
