Delusions of Reality Scott Allan Tacke, 2007-12-01 An eclectic collection of original verse filled with fantastical heroes and dastardly villains visionary hallucinations and empirical perspectives inflammatory opinions and intimate confessions metaphysical mysteries and secrets revealed More novel and entertaining than anything currently in print in contemporary American verse This is NOT your grandmother's poetry

Megaphysics Ii: An Explanation of Nature Dr. Mitchell Wick, 2015-07-30 This book is a comprehensive mathematical exposition of how one inch long equation space time is directly proportional to space and inversely proportional to mass can be used to explain all phenomena of nature It explains the equation in terms of metric tensors and in terms of quantum mechanics and demonstrate how they equal each other and the equation of everything which in tensors is Riemannian 4 space Minkowski 3 space 1 2 space time curvature metric called gravity Ricci tensor of inertial mass all multiplied by $1/c^2$ or if substituting the Ricci Tensor c^2 by the energy density of matter completes the equation A new mathematical operator is introduced called the spiral operator which describes space time in black holes and the total curvature of the universe is mathematically determined Black energy and dark matter are shown how they interrelate and relate to what caused the big bang and there is a theory as to what occurred prior to the big bang Also a mathematical mechanism is given showing a rotational component in the quantum bubble prior to the big bang and how it fits with nature The book applies some comments made by other physicists about compactification rolled or curled up dimensions to show the compactified circle of Type IIa string theory can be applied to arc length as space time the radius as the sum of all Riemann Forces and the angle as space time curvature Relativity and cosmology are explained as well as quantum mechanics including the Schrodinger equation and how many more compactified dimensions can exist besides the postulated twenty six in string theory M Theory is also explained along with membranes and how they interrelate to energy and matter The Hawking paradox is solved using Schwarzschild space time and much more

Quantum Reprogramming E.J. Post,2013-06-29 Many perhaps most textbooks of quantum mechanics present a Copenhagen single system angle fewer present the subject matter as an instrument for treating ensembles but the two methods have been silently coexisting since the mid Thirties This lingering dichotomy of purpose for a major physical discipline has much shrouded further insights into the foundations of quantum theory Quantum

Reprogramming resolves this long standing dichotomy by examining the mutual relation between single systems and ensembles assigning each its own tools for treating the subject at hand i e Schr dinger Dirac methods for ensembles versus period integrals for single systems A unified treatment of integer and fractional quantum Hall effects and a finite description of the electron s anomalies are mentioned as measures of justification for the chosen procedure of resolving an old time dichotomy The methods of presentation are in part elementary with repetitive references needed to delineate differences with respect to standard methods The parts on period integrals are developed with a perspective on elementary methods in physics thus leading up to some standard results of de Rham theory and algebraic topology Audience Students of physics mathematics philosophers as well as outsiders with a general interest in the conceptual development of physics will find useful reading in these pages which will stimulate further inquiry and study The Journal of Education ,1891 *Queries* ,1887 The Software Encyclopedia ,1988 **The Publishers Weekly** ,1897 **the queen's university calendar** ,1874
