Galvin,Madelaine Bishop,2010-12-20 This book provides support at curriculum level for developing the complementary
potential which exists between complementary and conventional western medicine It provides students teachers and
practitioners with a framework within which they can effectively analyse and classify the extensive amount of information
gathered in a CAM consultation and help them develop effective and appropriate treatment programmes within the time
constraints of a busy clinic It provides an insight into the initial CAM consultation process offering possible treatment and
collaborative referral options for individual cases rather than dictating diagnostic analysis or treatment protocols for specific
conditions Question suggestions have been provided to help the user collect the necessary information to develop a working
diagnosis and treatment protocol for each individual case Readers can then adapt questions decision making tools and
therapeutic recommendations to suit the needs of their own clients Complementary practitioners are often uncertain about
the legal and ethical boundaries regarding diagnosis and case management This book will help CAM students and
practitioners recognise situations requiring referral understand their role in collaborative case management and confidently
integrate a range of CAM modalities in treatment programmes Provides a clear case analysis format which can be and
adapted to suit the requirements of individual case histories Specific questioning format Clearly identifies situations where
cross or collaborative referral is necessary Decision tables help readers prioritise treatment refer appropriately and help
guide clinical thinking when readers are faced with several treatment options Class tested curriculum based *British*
