Contemporary Military Reserves Eyal Ben-Ari, Vincent Connelly, 2022-12-30 This book offers a comparative study of military reserves in contemporary democracies A combination of budgetary pressures new missions and emerging military roles during the past three decades has led the armed forces of democracies to rethink the training and use of reserve forces Moreover reservists have become central to the armed forces as part of moves towards total or comprehensive defense Despite this a scholarly bias towards studying regulars and conscripts means that reservists and reserve soldiers continue to receive only marginal attention This volume fills that lacuna through a series of country studies examining how best to understand the peculiarities of reservist service In contrast to regulars and conscripts reservists are marked by their dual management of civilian and military careers different family dynamics diverse motivations and commitment to the armed forces the material and non material incentives they are offered and their place in the political sphere This volume suggests two frames to make sense of such differences first it looks

at reservists as transmigrants traveling between the military and civilian worlds and second it analyzes the multiple informal contracts and negotiations that bind them to the military All the chapters adopt these conceptualizations granting the volume a common focus and integrative frame The volume will be of much interest to students of military and strategic studies civil military relations sociology and International Relations **Annual Abstract of Statistics** ,2016 Each no contains statistics for each preceding 15 years Bioaerosols Emission from Anthropogenic Sources Nitin Kumar Singh,Gaurav Sanghvi,Manish Yadav,2023-09-14 Bioaerosols Emission from Anthropogenic Sources Influencing Factors Microbial Diversity Epidemiological Threats and Control Approaches covers various sources of biohazards and their associated risk factors These air contaminants are developing concerns to people and the environment and must be addressed to avert future dangers As little is known about their precise sources controlling variables microbial diversity the involvement of co pollutants and dispersion and control methods this book will assist stakeholders including the public government officials and policymakers in developing successful strategies for ensuring society s safety Identifies potential emission stages at different anthropogenic sources of bioaerosols Discusses characteristics fate and development of effective control strategies for minimizing exposure to site specific bioaerosols Presents cleaner production and sustainable development tactics of bioaerosols *Catalog of Aeronautical and Allied Technical Documents* United States. The F-100 Units of USAFE Doug Gordon, 2024-01-07 The North American F 100 Super Sabre

served with the United States Air Forces in Europe for a total of sixteen years at the height of the Cold War The primary mission of the USAFE units that flew the hun was the delivery of tactical nuclear weapons on targets in the Soviet Union and Eastern Europe The nuclear mission was practised on the gunnery ranges of Europe the Mediterranean region and North Africa The pilots called bomb commanders sat alert all over Europe to take off at a moment s notice and fly alone into the heart of enemy territory carrying just one atomic bomb often more powerful than those dropped on the cities of Hiroshima and Nagasaki at the end of the Second World War These dedicated pilots acknowledged that many of their targets were situated so far away that there would be no prospect of return to their home base and their families and friends The secondary mission of the USAFE F 100 units was to prepare for conventional war

Personalized Sport and Exercise Nutrition Wim Derave,Bryan Saunders,Ahmed El-Sohemy,2019-10-18 Personalization is a key term when talking about the future of all medical disciplines including nutrition and more specifically sport nutrition The prospect of better tailored and more effective sport nutrition sounds appealing but the research in personalized sport nutrition is somewhat lacking Emerging evidence indicates that sport nutrition supplements and strategies may work in some individuals or under certain conditions yet not in others Research on novel ergogenic performance enhancing dietary approaches is often inconclusive because we fail to understand the environmental and genetic factors impacting the inter individual responses to their intake and metabolism These scientific hurdles need to be cleared before we can move to genetic or other screening tests to tailor sport supplement and macro and micronutrient intake advice This Research Topic provided a platform for original data and reviews on novel strategies for personalized sport and exercise nutrition resulting in a diverse selection of published articles in the area
