Airbus Stard Practices Manual:

Industrial Aviation Management Martin Hinsch, 2018-09-07 This book outlines the structure and activities of companies in the European aviation industry. The focus is on the design, production and maintenance of components, assemblies, engines and the aircraft itself. In contrast to other industries, the technical aviation industry is subject to many specifics since its activities are highly regulated by the European Aviation Safety Agency (EASA), the National Aviation Authorities and by the aviation industry standard EN 9100. These regulations can influence the companies' organization, personnel qualification, quality management systems as well as the provision of products and services. This book gives the reader a deeper, up-to-date insight into today's quality and safety requirements for the modern aviation industry. Aviation-specific interfaces and procedures are looked at from both the aviation legislation standpoint as well as from a practical, operational perspective.

Introduction to Maintenance, Repair and Overhaul of Aircraft, Engines and Components Shevantha Weerasekera, 2020-12-29 Introduction to Maintenance, Repair and Overhaul of Aircraft Engines and Components brings together the basic aspects of a fundamentally important part of the aerospace industry: the one that supports the global technical efforts to keep passenger and cargo planes flying reliably and safely. Over time, aircraft components and structural parts are subject to environmental effects such as corrosion and other types of material deterioration, wear and fatigue. Such parts could fail in service and affect the safe operation of the aircraft if the degradation were not detected and addressed in time. Regular planned maintenance supports the current and future value of the aircraft by minimizing the physical decline of the aircraft and engines throughout its life. Introduction to Maintenance, Repair and Overhaul of Aircraft Engines and Components was written by the industry veteran Shevantha K. Weerasekera, an aerospace engineer with 20 years of aircraft maintenance experience who currently leads the engineering team of a major technical enterprise in the field. *Federal Register*, 2014-02

Die vierte Auflage ist um die Vorgaben der EASA-Regelwerke aktualisiert. Auch die Anforderungen der EN 9100 in ihrer 2018er Revision werden berücksichtigt. Auch die Nähe zur Praxis ist gegeben. Sie wird unter anderem gewährleistet durch neue Grafiken, Case Studies.
