AI Governance Handbook Sunil Gregory, Anindya Sircar, 2025-09-15 Enterprise AI represents a transformative moment in technology empowering businesses to unlock the potential of data automation and advanced analytics. It drives innovation, streamlines operations, and amplifies competitiveness in an increasingly digital economy. Yet as promising as this technology is, adopting Enterprise AI is no simple feat. It demands a strategic alignment of AI initiatives with organizational goals while addressing many complex risks and challenges. Businesses face a new frontier of operational dilemmas from algorithmic bias and data privacy concerns to the legal and ethical quandaries of AI-generated content. Questions of accountability for AI actions, intellectual property rights, and the threat of data laundering or AI hallucinations further complicate the landscape. Amid these challenges, enterprises are tasked with navigating a pre-regulatory era where global authorities are racing to establish policies and frameworks for a trustworthy and lawful AI ecosystem. The *AI Governance Handbook* is a comprehensive guide tailored for stakeholders at the forefront of AI adoption: executives, managers, data scientists, engineers, and compliance professionals. This essential resource provides the knowledge, tools, and strategies to lead organizations through the complexities of implementing AI responsibly and effectively. Packed with actionable insights, the handbook explores critical topics such as aligning AI strategies with organizational objectives, managing ethical dilemmas, adhering to emerging regulations, and fostering transparency in AI operations. It offers readers a roadmap to build a resilient and dependable AI framework prioritizing fairness, accountability, and innovation.

Air Transport and Operations Richard Curran, 2012 Air transport must evolve if it is to optimize its value in the 21st century. The mood in the aerospace industry is positive with regard to economic recovery, but the focus in this transitional time must be on sustaining value without losing sight of environmental and safety priorities. This book presents the proceedings of the joint conference held in Delft, the Netherlands, in June 2012, incorporating the 3rd International Air Transport Operations Symposium, ATOS, the 3rd Association of Scientific Development in Air Traffic Management in Europe, ASDA Seminar, the 6th International Meeting for Aviation Products Support Processes, IMAPP, and the 2012 Complex World Seminar. The conference brought together over 200 participants from industry and academia, all of whom share the common goal of improving performance and capacity by advancing the efficiency, sustainability, and safety of air transport. Presentations at the conference were divided equally between academic papers and more applied industry sessions. The book includes the majority of academic papers presented at the conference and provides a wide overview of the issues currently of importance in the world of air transport.
