From F-4 Phantom to A-10 Warthog Steve Ladd, Steven K. Ladd, 2020-09-30 This behind the scenes account of a USAF career is an absorbing read written with the classic humor fighter pilots seem to have. Flight Line Book Review From Baron von Richthofen to Robin Olds, the mystique of the fighter pilot endures. The skill, cunning and bravery that characterizes this distinctive band of brothers is well known, but there are other dimensions to those who take to the skies to do battle that have not been given the emphasis they deserve until now. You don't have to be an aviation aficionado to enjoy Colonel Steve Ladd's fascinating personal tale woven around his twenty-eight year career as a fighter pilot. This extremely engaging account follows a young man from basic pilot training to senior command through narratives that define a unique ethos. From the United States to Southeast Asia, Europe to the Middle East, the amusing and tongue-in-cheek to the deadly serious and poignant, this is the lifelong journey of a fighter pilot. The anecdotes are absorbing, providing an insight into life as an Air Force pilot, but in this book, as Colonel Ladd stresses, the focus is not on fireworks or stirring tales of derring-do. Instead, this is an articulate and absorbing account of what life is

really like among a rare breed of arrogant cocky boisterous and fun loving young men who readily transform into steely professionals at the controls of a fighter aircraft This book will appeal to a variety of readers with its Vietnam War combat stories and accounts of flying the Warthog in Cold War Europe Fun flying international experiences you won t want to put it down Aviation News Proceedings of the First Symposium on Aviation Maintenance and Management-Volume I Jinsong Wang,2014-03-18 Proceedings of the First Symposium on Aviation Maintenance and Management collects selected papers from the conference of ISAMM 2013 in China held in Xi an on November 25 28 2013 The book presents state of the art studies on the aviation maintenance test fault diagnosis and prognosis for the aircraft electronic and electrical systems The selected works can help promote the development of the maintenance and test technology for the aircraft complex systems Researchers and engineers in the fields of electrical engineering and aerospace engineering can benefit from the book Jinsong Wang is a professor at School of Mechanical and Electronic Engineering of Northwestern Polytechnical University China
