Annual Report Corporate Shared Values:

Creating Shared Value Asit K. Biswas, Cecilia Tortajada, Andrea Biswas-Tortajada, Yugal K. Joshi, Aishvarya Gupta, 2013-09-13 Nestl's Moga factory was set up in 1961 and comprises of the primary milk collection area for Nestl's operations. Since its inception in Moga, Nestl has been working with its milk farmers and ancillary suppliers towards improving quality and productivity. The study presented in this book, carried out by the Third World Centre for Water Management, Mexico, highlights Nestl's way of doing business through its philosophy of Creating Shared Value (CSV) and how it contributed to the development of the region over the past 50 years through direct and indirect employment, steady income for milk and other suppliers, and technology transfer. The main objective of the study is to learn to what extent has Nestl contributed to fulfilling the societal aspirations and expectations of the people working in and around its factory in terms of employment, generation, poverty alleviation, general improvements in the community's standards of living, and environmental conservation. The study also tried to determine to what extent has the company created shared value for itself, milk farmers, ancillary firms, and the community at large. This effort aims at encouraging more research to be carried out to comprehensively and authoritatively look into the impacts the private sector can have on and around the area where their factories are located and that way contribute to our understanding of social corporate government interdependency. An important aspect of this pioneering monograph is the methodology that could be used to study how Corporate Social Responsibility (CSR) or Creating Shared Value (CSV) of a large multinational company can be properly monitored and objectively evaluated at a region-specific scale, especially as very few studies of this nature have been carried out anywhere in the world. This definitive book is further enriched by a foreword by Prof. Michael Porter of Harvard Business School and an epilogue by Peter Brabeck-Letmathe and Paul Bulcke, Chairman of the Board and CEO of Nestl, respectively.

Shared Value, Shared Responsibility Emma Wilson, Judy Kuszewski, 2011 High prices and concerns about energy security in the oil and gas industry are driving expansion into ever more sensitive environments with greater technological, political, and social risks. While brands such as BP, Shell, and ExxonMobil are well known, some 70 per cent of

oil and gas industry activities are typically contracted out to service providers and their subcontractors. The fallout from the April 2010 Gulf of Mexico disaster has shone a spotlight on alleged systemic failures and ongoing difficulties in contracting relationships. As the governments of oil producing countries from Nigeria to Kazakhstan to Venezuela seek to take greater control of their oil and gas resources, there are pressures to expand the role of local businesses in chains of contractors. Government targets for local hiring and procurement. Paper draws on three years of research and interviews within the oil and gas sector to highlight an array of critical challenges facing oil and gas companies involved in complex supply chains and to identify urgent and longer term actions for progress. *The Sustainable Business Blueprint* Zabihollah Rezaee, 2024-08-14
