Advances in Ubiquitous Networking Essaïd Sabir, Hicham Medromi, Mohamed Sadik, 2016-02-02 This volume publishes new trends and findings in hot topics related to ubiquitous computing networking It is the outcome of UNet a international scientific event that took place on September 08 10 2015 in the fascinating city of Casablanca Morocco UNet 15 is technically sponsored by IEEE Morocco Section and IEEE COMSOC Morocco Chapter

Advanced Millimeter-wave Technologies Duixian Liu, Ulrich Pfeiffer, Janusz Grzyb, Brian Gaucher, 2009-03-03 This book explains one of the hottest topics in wireless and electronic devices community namely the wireless communication at mmWave frequencies especially at the 60 GHz ISM band It provides the reader with knowledge and techniques for mmWave antenna design evaluation antenna and chip packaging Addresses practical engineering issues such as RF material evaluation and selection antenna and packaging requirements manufacturing tolerances antenna and system interconnections and antenna One of the first books to discuss the emerging research and application areas particularly chip packages with integrated antennas wafer scale mmWave phased arrays and imaging Contains a good number of case studies to aid understanding Provides the antenna and packaging technologies for the latest and emerging applications with the emphases on antenna integrations for practical applications such as wireless USB wireless video phase array automobile collision avoidance radar and imaging

New Developments and Applications in Sensing Technology Subhas Chandra Mukhopadhyay, Aimé Lay-Ekuakille, Anton Fuchs, 2011-01-22 This book has focussed on different aspects of smart sensors and sensing technology i e intelligent measurement information processing adaptability recalibration data fusion validation high reliability and integration of novel and high performance sensors in the areas of magnetic ultrasonic vision and image sensing wireless sensors and network microfluidic tactile gyro flow surface acoustic wave humidity and ultra wide band While future interest in this field is ensured by the constant supply of emerging modalities techniques and engineering solutions as well as an increasing need from aging structures many of the basic concepts and strategies have already matured and now offer opportunities to build upon The book has primarily been focussed for postgraduate and research students working on

different aspects of design and developments of smart sensors and sensing technology

The RF and Microwave

Handbook Mike Golio, 2000-12-20 The recent shift in focus from defense and government work to commercial wireless efforts has caused the job of the typical microwave engineer to change dramatically The modern microwave and RF engineer is expected to know customer expectations market trends manufacturing technologies and factory models to a degree that is unprecedented in the *Compact Models and Measurement Techniques for High-Speed Interconnects* Rohit Sharma, Tapas Chakravarty, 2012-02-17 *Compact Models and Measurement Techniques for High Speed Interconnects* provides detailed analysis of issues related to high speed interconnects from the perspective of modeling approaches and measurement techniques Particular focus is laid on the unified approach variational method combined with the transverse transmission line technique to develop efficient compact models for planar interconnects This book will give a qualitative summary of the various reported modeling techniques and approaches and will help researchers and graduate students with deeper insights into interconnect models in particular and interconnect in general Time domain and frequency domain measurement techniques and simulation methodology are also explained in this book

Exponential Data Fitting and Its Applications

Victor Pereyra, Godela Scherer, 2010 Real and complex exponential data fitting is an important activity in many different areas of science and engineering ranging from Nuclear Magnetic Resonance Spectroscopy and Lattice Quantum Chromodynamics to Electrical and Chemical Engineering Vision a *Practical Guide to RF-MEMS* Jacopo Iannacci, 2013-08-12 Closes the gap between hardcore theoretical and purely experimental RF MEMS books The book covers from a practical viewpoint the most critical steps that have to be taken in order to develop novel RF MEMS device concepts Prototypical RF MEMS devices both including lumped components and complex networks are presented at the beginning of the book as reference examples and these are then discussed from different perspectives with regard to design simulation packaging testing and post fabrication modeling Theoretical concepts are introduced when necessary to complement the practical hints given for all RF MEMS development stages Provides researchers and engineers with invaluable practical hints on how to develop novel RF MEMS device concepts Covers all critical steps dealing with design simulation optimization characterization and fabrication of MEMS for radio frequency applications Addresses frequently disregarded issues explicitly treating the hard to predict interplay between the three dimensional device structure and its electromagnetic functionality Bridges theory and experiment fundamental concepts are introduced with the application in mind and simulation results are validated against experimental results Appeals to the practice oriented R D reader design and simulation examples are based on widely known software packages such as ANSYS and the hardware description language Verilog *Low Power VCO Design in CMOS* Marc Tiebout, 2006-01-25 This work covers the design of CMOS fully integrated low power low phase noise voltage controlled oscillators for telecommunication or datacommunication systems The need for low power is obvious as mobile wireless telecommunications are battery operated As wireless telecommunication systems use oscillators in frequency

synthesizers for frequency translation the selectivity and signal to noise ratio of receivers and transmitters depend heavily on the low phase noise performance of the implemented oscillators Datacommunication systems need low jitter the time domain equivalent of low phase noise clocks for data detection and recovery The power consumption is less critical The need for multi band and multi mode systems pushes the high integration of telecommunication systems This is offered by sub micron CMOS featuring digital exibility The recent crisis in telecommunication clearly shows that mobile hand sets became mass market high volume consumer products where low cost is of prime importance This need for low cost products livens tremendously research towards CMOS alternatives for the bipolar or BiCMOS solutions in use today **TECHNICAL**

WRITING BASU, B.N.,2007-12-29 This book deals with technical writing with an emphasis on how to write a thesis for a university degree or a research paper for publication in a journal It teaches students step by step through several examples how to plan organize draft develop and prepare such a document for presentation The book gives besides usage in grammar a precise method of preparing a document simply clearly and concisely organizing it by going into the details of its front matter main text and end matter and its subdivisions without missing the finer details like figures tables equations references etc It describes how to compile and locate the original sources and view the specific topic to be researched in the background of earlier contributions It addresses issues related to identifying such authors and their writings through their names and affiliations and abstracts of the work etc Some peripheral issues such as certificate and copyright have also been discussed The book will be useful to students engineers and scientists alike helping them break the ice by removing their confusion bewilderment and hesitation in technical writing It would be a boon to the beginners as it would help them understand quickly many of the steps of the technique of technical writing instead of learning the hard way from long experience which the author has shared in this book with the prospective readers
