Triangle Norman Reid, 2021-01-18 Chemistry is often seen as a difficult subject to understand This book focusses on the triangle model that Alex H Johnstone developed in the early 1980s Originally conceived in the context of making chemistry more accessible to a wider range of learners the model has been applied in almost every area of education in chemistry at all stages of learning In looking at why chemistry is difficult there are two central questions Firstly does the problem relate to the nature of chemistry and secondly does it relate to the way humans gain understanding Both were found to be important and the answers to the two question were found to be connected The triangle model arose from sustained research into human learning The central finding from research is the critical role of working memory and the model rationalises so much evidence from chemistry education research as well as the repeated experiences of teachers of chemistry at all levels In order to understand chemistry it is essential to develop sound mental models of molecular reality It generates major implications for the way a chemistry curriculum should be constructed and the processes of teaching and learning in chemistry when the goal is focussed on understanding the key ideas Some of these implications are developed and pointers offered to more successful ways forward The power of the Johnstone Triangle lies in the way it offers clear directions for all involved in chemistry education It is hoped that this book will prove helpful to all involved in sharing the exciting story of the way humans have come to understand the molecular world one of the great examples of great human endeavour Writing

as a Learning Tool Päivi Tynjälä, L. Mason, K. Lonka, 2012-12-06 In a brief summary the debate concerning the nature of writing processes is about whether the essential characteristic of expertise in writing is a matter of mastering problem solving strategies In this respect the role of social and interactive factors such as writers familiarity with the particular genre in which they are writing and their relationship with the discourse community in which they are participating have been

pointed out e.g. Nystrand 1989 According to the socio interactive approach which refers to Vygotsky's theory the composition process is a dialogue between the writer and the reader made possible by socially shared knowledge The meaning of a text is a social construct that is negotiated between the reader and the writer through the medium of the text The importance of motivational aspects has also been highlighted by two main lines of research studies of the relationship between writing and self efficacy e.g. Pajares Benton Corkill Sharp Downey Khramtsova 1995 Hidi McLaren 1990 1991 Self efficacy in this context individuals beliefs about their ability to produce certain types of texts have been found to be predictive of writing skills strategy use and writing performance
