Reinforcement and Study Guide

Section 10.1 Mendel's Laws of Heredity

In your textbook, read why Mendel succeeded.

Complete each statement.

- Mendel was the first person to succeed in predicting how traits are transferred from generation to generation.
- Mendel used garden pea plants in his experiments.
- In peas, both male and female sex cells—gametes—are in the same flower.
- fertilization occurs when the male gamete fuses with the female gamete.
- Mendel used the process called Cross-pollination when he wanted to breed one plant with another.
- Mendel carefully Controlled his experiments and the peas he used.
- Mendel studied only one trait at a time and analyzed his data mathematically.

In your textbook, read about Mendel's monohybrid crosses.

Refer to the table of pea-plant traits on the right. Then complete the table on the left by filling in the missing information for each cross. The first one is done for you.
