

Astronomy Ranking Task: The Seasons

Exercise #4

Description: In the figure below six different locations (A - F) on Earth are shown during a particular time of the year, with the Earth being at its greatest amount of tilt toward or away from the sun for each (i.e. a solstice). Note that each location is also at the same latitude (north or south) of the equator.

FIRST (a) label the hemisphere of each letter AND (b) the solstice it would be experiencing.

A. Ranking Instructions: Rank the time it takes (from longest to shortest) for each location (A - F) to complete one full rotation.

Ranking Order: Longest time 1 _____ 2 _____ 3 _____ 4 _____ 5 _____ 6 _____ Shortest time

Or, the time it takes each location to make one full rotation is the same. ☒ (indicate with check mark).

Carefully explain your reasoning for ranking this way:

in part of the earth 24hrs each day, so while ^{earth} rotates around the sun each part gets an equal share of ^{sun's} ~~sun's~~ ^{light} ~~light~~

B. Ranking Instructions: Rank the maximum height (from lowest to highest) the sun would reach during the course of one full rotation.

Ranking Order: lowest 1 _____ 2 _____ 3 _____ 4 _____ 5 _____ 6 _____ highest

Or, maximum height reached at each location is the same. _____ (indicate with check mark).

Carefully explain your reasoning for ranking this way:
