Alexsis Ferguson
Natural selection lab

Objective(s):

In this lab, we will learn to:

- identify different types of evolutionary adaptations
- explain ways in which genetic variation and environmental factors contribute to evolution by natural selection and diversity
- simulate the effects of natural selection and genetic variation under specific environmental conditions=

Hypotheses:

1. The environment with snow will have an increase in population of white rabbits over time.
2. the Environment with brown woods will have a decrease in population of white rabbits over time.

Variables:

- IV- control of predatory bird
- DV- number/color of fur of rabbits that survive over generation
- con- con-amount of rabbits initially/Environment

Materials:

1. The Natural Selection Virtual Lab Activity
2. Natural Selection Virtual Lab Report

Procedures:

The procedures are listed in Natural Selection Virtual Lab Activity. You do not need to include them here.

Science Educator's Guide to Laboratory Assessment Rodney L. Doran, 2002 The book opens with an up to date discussion of assessment theory research and uses Then comes a wealth of sample assessment activities in biology chemistry physics and Earth science Keyed to the National Science Education Standards the activities include reproducible task sheets and scoring rubrics All are ideal for helping students reflect on their own learning during science lab **K-12 STEM Education: Breakthroughs in Research and Practice** Management Association, Information Resources, 2017-10-31 Education is vital to the progression and sustainability of society By developing effective learning programs this creates numerous impacts and benefits for future generations to come K 12 STEM Education Breakthroughs in Research and Practice is a pivotal source of academic material on the latest trends techniques technological tools and scholarly perspectives on STEM education in K 12 learning environments Including a range of pertinent topics such as instructional design online learning and educational technologies this book is an ideal reference source for teachers teacher educators professionals students researchers and practitioners interested in the latest developments in K 12 STEM education **Revolutionizing K-12 Blended Learning through the i²Flex Classroom Model** Avgerinou, Maria D., Gialamas, Stefanos P., 2016-06-20 Blended learning has gained significant attention recently by educational leaders practitioners and researchers i Flex a variation of blended learning is based on the premise that certain non interactive teaching activities such as lecturing can take place by students without teachers direct involvement Classroom time can then be used for educational activities that fully exploit teacher student and student student interactions allowing for meaningful personalized feedback and scaffolding on demand Revolutionizing K 12 Blended Learning through the i Flex Classroom Model presents a well rounded discussion on the i Flex model highlighting methods for K 12 course design delivery and evaluation in addition to teacher performance assessment in a blended i Flex environment Emphasizing new methods for improving the classroom and learning experience in addition to preparing students for higher education and careers this publication is an essential reference source for pre service and in service teachers researchers administrators and educational technology developers **A Lab for All Seasons** Sharon E. Kingsland, 2023-07-25 The first book to chronicle how innovation in laboratory designs for botanical research energized the emergence of physiological plant ecology as a vibrant subdiscipline Laboratory innovation since the mid twentieth century has powered advances in the study of plant adaptation evolution and ecosystem function The phytotron an integrated complex of controlled environment greenhouse and laboratory spaces invented by Frits W Went in the 1950s set off a worldwide laboratory movement and transformed the plant sciences Sharon Kingsland explores this revolution through a comparative study of work in the United States France Australia Israel the USSR and Hungary These advances in botanical research energized physiological plant ecology Case studies explore the development of phytotron spinoffs such as mobile laboratories rhizotrons and ecotrons Scientific problems include the significance of plant emissions of volatile organic

compounds symbiosis between plants and soil fungi and the discovery of new pathways for photosynthesis as an adaptation to hot dry climates The advancement of knowledge through synthesis is a running theme linking disciplines combining laboratory and field research and moving across ecological scales from leaf to ecosystem The book also charts the history of modern scientific responses to the emerging crisis of food insecurity in the era of global warming *Integrated Science Laboratory Manual* Michael J. Padilla, 2000 Includes 74 investigations pre lab discussions and critical thinking questions safety manual and student safety test teaching support

Wild Immunology—The Answers Are Out There Gregory M. Woods, Andrew S. Flies, 2019-03-20 Go into partnership with nature she does more than half the work and asks none of the fee Martin H Fisher Nature has undertaken an immense amount of work throughout evolution The evolutionary process has provided a power of information that can address key questions such as Which immune molecules and pathways are conserved across species Which molecules and pathways are exploited by pathogens to cause disease What methods can be broadly used or readily adapted for wild immunology How does co infection and exposure to a dynamic environment affect immunity Section 1 addresses these questions through an evolutionary approach Laboratory mice have been instrumental in dissecting the nuances of the immune system The first paper investigates the immunology of wild mice and reviews how evolution and ecology sculpt differences in the immune responses of wild mice and laboratory mice A better understanding of wild immunology is required and sets the scene for the subsequent papers Although nature doesn't ask for a fee it is appropriate that nature is repaid in one form or another The translational theme of the second section incorporates papers that translate wild immunology back to nature But any non human non laboratory mouse research environment is hindered by a lack of research tools hence the underlying theme throughout the second section Physiological resource allocation is carefully balanced according to the most important needs of the body Tissue homeostasis can involve trade offs between energy requirements of the host and compensatory mechanisms to respond to infection The third section comprises a collection of papers that employ novel strategies to understand how the immune system is compensated under challenging physiological situations Technology has provided substantial advances in understanding the immune system at cellular and molecular levels The specificity of these tools e g monoclonal antibodies often limits the study to a specific species or strain A consequence of similar genetic sequences or cross reactivity is that the technology can be adapted to wild species Section 4 provides two examples of probing wild immunology by adapting technology developed for laboratory species EMRS PGT Biology Test Papers (15) , EMRS PGT Biology teachers Test Papers 15 Methuselah Flies: A Case Study In The Evolution Of Aging Michael Robertson Rose, Hardip B Passananti, Margarida Matos, 2004-06-14 Methuselah Flies presents a trailblazing project on the biology of aging It describes research on the first organisms to have their lifespan increased and their aging slowed by hereditary manipulation These organisms are fruit flies from the species *Drosophila melanogaster* the great workhorse of genetics Michael Rose and his colleagues have been able to double the lifespan of these insects and improved

their health in numerous respects as well The study of these flies with postponed aging is one of the best means we have of understanding and ultimately achieving the postponement of aging in humans As such the carefully presented detail of this book will be of value to research devoted to the understanding and control of aging Methuselah Flies is a tightly edited distillation of twenty years of work by many scientists contains the original publications regarding the longer lived fruit flies offers commentaries on each of the topics covered new short essays that put the individual research papers in a wider context gives full access to the original data captures the scientific significance of postponed aging for a wide academic audience
