Good Cascade Impactor Practices, AIM and EDA for Orally Inhaled Products Terrence P. Tougas, Jolyon P.

Mitchell, Svetlana A. Lyapustina, 2013-04-10 The purpose of this publication is to introduce a new simpler and more effective way in which to interpret pharmaceutical aerosol particle size data from orally inhaled products OIPs Currently the compendial and regulatory requirements dictate the need for measurements by full resolution multi stage cascade impactor CI a process that is demanding for the operator time consuming prone to experimental error and challenging for method transfers from one laboratory to another Furthermore we shall show that the current practice of reducing information from mass weighted aerodynamic particle size distribution APSD measurements through the use of CI stage groupings is not the most effective decision making tool for OIP quality control QC in comparison with newly introduced mutually independent efficient data analysis EDA metrics that can be derived either from full resolution or abbreviated impactor measurements
