About Mathematics Gerald R. Rising, James R. Matthews, Eileen Schoaff, Judith Matthew, 2021 Mathematics is an essential component of the educated mind It has two important roles to play as queen of the sciences providing the logical structure that holds science together and as a handmaiden to those sciences carrying out the computations that apply scientific concepts Unfortunately a gulf exists between science and the humanities and our text About Mathematics seeks to bridge that gap to serve humanities students just as humanities texts are offered to inform science students In doing so unlike most math texts we avoid the usual focus on detailed techniques to expose instead some of the important concepts and values of mathematics **Teaching and Learning Secondary School Mathematics** Ann Kajander, Jennifer Holm, Egan J Chernoff, 2018-10-24 This volume brings together recent research and commentary in secondary school mathematics from a breadth of contemporary Canadian and International researchers and educators It is both representative of mathematics education generally as well as unique to the particular geography and culture of Canada The chapters address topics of broad applicability such as technology in learning mathematics recent interest in social justice contexts in the learning of mathematics as well as Indigenous education The voices of classroom practitioners the group ultimately responsible for implementing this new vision of mathematics teaching and learning are not forgotten Each section includes a chapter written by a classroom teacher making this volume unique in its approach We have much to learn from one another and this volume takes the stance that the development of a united vision supported by both research and professional dialog provides the first step *Activities for Junior High School and Middle School Mathematics* Kenneth E. Easterday, Loren L. Henry, F. Morgan Simpson, 1981 Activities are one means of connecting both the various strands of mathematics with one another and mathematics with other disciplines This compilation of articles from NCTM journals includes strands on problem solving reasoning number relationships statistics and more College Admission 101 The Princeton Review, Robert Franek, 2018-06-12 This friendly helpful Q A book from the editor in chief of The Princeton Review presents simple answers
