

The background of the book cover is a photograph of a vast, open landscape. The foreground is filled with tall, golden-brown grasses that appear to be blowing in the wind. A narrow, light-colored path or streambed winds through the grass towards the horizon. The sky above is a deep blue, filled with large, white, fluffy clouds that are also blowing across the frame. The overall mood is one of natural beauty and vastness.

A Reading of Elemental Ecocriticism in Select Northeast Indian English Poetry Ruth Magdalene,2023-09-30 Elemental Ecocriticism An in depth exploration of the intricate relationship between nature and human existence through the lenses of four visionary poets This book delves into the macro and micro level injustices inflicted upon the elements of nature as conveyed through systematically crafted narratives Through the poetical verses of these four poets the principles and features of the elements are showcased highlighting their importance for human ecstasy and existence A must read for those seeking a deeper understanding of the complex interplay between humanity and the natural world

The Hidden Army - MI9's Secret Force and the Untold Story of D-Day Matt Richards,2018-07-05 Almost seventy five years ago MI9 dreamt up the most audacious escape and evasion plan of World War Two Formulated by Airey Neave one of the first men ever to escape from Colditz this plan was one of subterfuge concealment and deception on a scale never seen before With numerous downed RAF and Allied pilots on the run in Europe and with the fabled Comete Escape Line having been infiltrated by double agents Neave s plan

was to hide these men right under the very noses of the Nazis rather than risk repatriation. Choosing a forest in the heart of France right next to one of the German Army's largest ammunition bases. Neave, Belgian agents and the French Resistance would secretly transport and hide Allied pilots and soldiers within feet of the enemy. Nobody thought it would work but such was the success of the secret camp that a whole community of over one hundred and fifty Allied escapers lived within the forest for three months in the run up to D Day. Despite numerous close shaves they were never discovered and this outrageous plan brilliant in its simplicity saw the Allied evaders make their home in the forest cooking and hunting to survive and even setting up a golf course in the forest using branches for clubs without discovery. This operation remained absolutely secret to the point that the inhabitants of the villages surrounding the forest were unaware until the end of the existence of that allied force so close to them. Told through interviews with evaders, members of the Resistance and the children charged with smuggling food into the forest, this book tells the compelling story of one of the most audacious operations in World War Two. A story that has until today remained as secret as the Hidden Army of Freteval.

Imagination in an Age of Crisis Jason Goroncy, Rod Pattenden, 2022-06-01 This book explores the vital role of the imagination in today's complex climates: cultural, environmental, political, racial, religious, spiritual, intellectual, etc. It asks: What contribution do the arts make in a world facing the impacts of globalism, climate change, pandemics and losses of culture? What wisdom and insight and orientation for birthing hope and action in the world do the arts offer to religious faith and to theological reflection? These essays, poems and short reflections written by art practitioners and academics from a diversity of cultures and religious traditions demonstrate the complex cross-cultural nature of this conversation, examining critical questions in dialogue with various art forms and practices and offering a way of understanding how the human imagination is formed, sustained, employed and expanded. Marked by beauty and wonder as well as incisive critique, it is a unique collection that brings unexpected voices into a global conversation about imagining human futures.

The Preacher's Guide to Suicide H. C. Johnson, 2022-03-18 This book makes the startling claim that the pulpit is the appropriate place to address suicide. In *A Preacher's Guide to Suicide*, Johnson chisels through the rusty prison bars of cultural pretense and the oppressive myths of suicide. Using history, the social and behavioral sciences and biblical inquiry over the centuries of varied Christian voices, Johnson demonstrates that suicide is part of the very fabric of Christian identity. And to preach suicide awareness is to preach life into the very act of dying. While grappling with the contemporary understanding of neuroscience, psychopathology, societal values and individualism, Johnson seeks to present suicide in a hopeful light as we all approach death in those daily moments of confession, forgiveness and prayer. Johnson hopes to provoke further conversation within the Christian community about the richness of suicide within the Scriptures and seeks to be a source of inspiration for preachers.

Elemental Ecocriticism Jeffrey Jerome Cohen, Lowell Duckert, 2015-12-23 For centuries it was believed that all matter was composed of four elements: earth, air, water and fire in promiscuous combination, bound by love and pulled apart by strife. Elemental theory offered a mode of understanding

materiality that did not center the cosmos around the human Outgrown as a science the elements are now what we build our houses against Their renunciation has fostered only estrangement from the material world The essays collected in Elemental Ecocriticism show how elemental materiality precipitates new engagements with the ecological Here the classical elements reveal the vitality of supposedly inert substances mud water earth air chemical processes fire and natural phenomena as well as the promise in the abandoned and the unreal ether phlogiston spontaneous generation Decentering the human this volume provides important correctives to the idea of the material world as mere resource Three response essays meditate on the connections of this collaborative project to the framing of modern day ecological concerns A renewed intimacy with the elemental holds the potential of a more dynamic environmental ethics and the possibility of a reinvigorated materialism
