Care and Repair of Advanced Composites Keith B Armstrong, Graham Bevan, William Cole, 2005-06-22 This second edition has been extensively updated to keep pace with the growing use of composite materials in commercial aviation A worldwide reference for repair technicians and design engineers the book is an outgrowth of the course syllabus that was developed by the Training Task Group of SAE s Commercial Aircraft Composite Repair Committee CACRC and published as SAE AIR 4938 Composite and Bonded Structure Technician Specialist Training Document Topics new to this edition include Nondestructive Inspection NDI Methods Fasteners for Composite Materials A Method for the Surface Preparation of Metals Prior to Adhesive Bonding Repair Design Although this book has been written primarily for use in aircraft repair other applications including marine and automotive are also covered **ZUM '98: The Z Formal Specification Notation** Jonathan P. Bowen, Andreas Fett, Michael G. Hinchey, 2011-04-06 1 In a number of recent presentations most notably at FME 96 one of the foremost

scientists in the field of formal methods C A R Hoare has highlighted the fact that formal methods are not the only technique for producing reliable software This seems to have caused some controversy not least amongst formal methods practitioners How can one of the founding fathers of formal methods seemingly denounce the field of research after over a quarter of a century of support This is a question that has been posed recently by some formal methods skeptics However Prof Hoare has not abandoned formal methods He is reiterating 2 albeit more radically his 1987 view that more than one tool and notation will be required in the practical industrial development of large scale complex computer systems and not all of these tools and notations will be or even need be formal in nature Formal methods are not a solution but rather one of a selection of techniques that have proven to be useful in the development of reliable complex systems and to result in hardware and software systems that can

be produced on time and within a budget while satisfying the stated requirements After almost three decades the time has come to view formal methods in the context of overall industrial scale system development and their relationship to other techniques and methods We should no longer consider the issue of whether we are pro formal or anti formal but rather the degree of formality if any that we need to support in system development This is a goal of ZUM 98 the 11th International Conference of Z Users held for the first time within continental Europe in the city of Berlin Germany *Code of Federal Regulations, Title 14, Aeronautics and Space*, 2011-04-21
