The Lorax Economics Movie Guide: Externalities

Section 1: Scarcity and Resource Use

(Timestamps: 0:10:00 - 0:15:00)

ANSWER KEY

- 1. What resources are essential for the Once-ler's production of the Thneed?**
Answer: Truffula Trees are essential for making Thneeds.
 - 2. Why are these resources considered "scarce" in the economic sense?**
Answer: Truffula Trees are limited and can't be easily replenished once cut down.
 - 3. Describe what happens to the supply of resources as the Once-ler's business grows. What does this teach us about scarcity and overuse?**
Answer: The supply of Truffula Trees diminishes, illustrating how overuse of scarce resources leads to depletion and scarcity.
 - 4. What alternative resources or methods could the Once-ler have used to make Thneeds without depleting natural resources?**
Answer: He could have developed synthetic materials or harvested only some trees to allow for regeneration.
-

Section 2: Opportunity Cost

(Timestamps: 0:16:30 - 0:18:30)

- 5. Define "opportunity cost" in your own words.**
Answer: Opportunity cost is the value of the next best alternative given up when making a decision.
 - 6. Identify the opportunity cost for the Once-ler when he decides to cut down Truffula Trees for production.**
Answer: The opportunity cost includes the environmental health of the area, such as clean air and the survival of local wildlife.
 - 7. What were some possible alternatives the Once-ler could have chosen? What would have been the opportunity costs of those choices?**
Answer: Alternatives include a slower, sustainable harvest method or planting new trees. The opportunity cost would be slower profits but a healthier ecosystem.
 - 8. How might the Once-ler's business decisions be different if he considered opportunity costs for the community and environment, rather than just for his company?**
Answer: He might have valued the preservation of natural resources, avoiding environmental degradation and community harm.

Applications of Mathematics in Economics Warren Page, 2013 Shows instructors what mathematics is used at the undergraduate level in various parts of economics Separate sections provide students with opportunities to apply their mathematics in relevant economics contexts Brings together many different mathematics applications to such varied economics topics **Structural Change, Competitiveness and Industrial Policy** Aurora Teixeira, Ester Silva, Ricardo Mamede, 2014-06-20 The onset of the global crisis has emphasised the persistence of substantial differences in development and social progress within the euro area The specific case of countries located in the southern periphery region has come to the centre stage due to the harsh economic conditions that all these countries have experienced in the recent past In the aftermath of the American subprime credit bubble these countries high indebtedness raised doubts as to their ability to sustain public finances with the financial crisis developing and gaining momentum due to the fragilities presented in the economy To varying degrees of severity all of these economies have since been forced to introduce strong fiscal tightening programmes in order to achieve fiscal consolidation which have translated into recession and rising unemployment This book undertakes a comprehensive analysis of the causes of the crisis in southern European countries showing that the Achilles heel of these economies is rooted in the dismal evolution of productivity and in a specialisation pattern excessively based on the so called traditional low and low medium tech industries which yield low margins declining export shares and ultimately withering international competitiveness Such evidence suggests that the southern European periphery industrial growth model has reached its limits demanding a multidimensional policy approach capable of overcoming the magnitude and complexity of the present crisis Without denying the need to adjust public and private balance sheets it is argued that finding

a sustainable path out of the present problems requires addressing the challenges of productivity growth and competitiveness in the long term **Handbook of the Economics of Education** Eric A Hanushek,F. Welch,2006-11-13

The Handbooks in Economics series continues to provide the various branches of economics with handbooks which are definitive reference sources suitable for use by professional researchers advanced graduate students or by those seeking a teaching supplement With contributions from leading researchers each Handbook presents an accurate self contained survey of the current state of the topic under examination These surveys summarize the most recent discussions in journals and elucidate new developments Although original material is also included the main aim of this series is the provision of comprehensive and accessible surveys Every volume contains contributions from leading researchers Each Handbook presents an accurate self contained survey of a particular topic The series provides comprehensive and accessible surveys

International Law and Agroecological Husbandry John W. Head,2016-11-25 I What might be preferable about agroecological husbandry *Environmental and Natural Resource Economics* Jonathan M. Harris,Brian Roach,2016-05-05

Harris and Roach present a compact and accessible presentation of the core environmental and resource topics and more with analytical rigor as well as engaging examples and policy discussions They take a broad approach to theoretical analysis using both standard economic and ecological analyses and developing these both from theoretical and practical points of view It assumes a background in basic economics but offers brief review sections on important micro and macroeconomic concepts as well as appendices with more advanced and technical material Extensive instructor and student support materials including PowerPoint slides data updates and student exercises are provided **The Oxford Handbook of Political Economy** Barry R. Weingast,Donald Wittman,2008-06-19 Over its lifetime political economy has had different meanings This handbook views political economy as a synthesis of the various strands of social science treating it as the methodology of economics applied to the analysis of political behaviour and institutions **The Irreconcilable Inconsistencies of Neoclassical Macroeconomics** John Weeks,2012-02-23 In the course of this book it is argued that the loss of what is essentially macro in Keynes is the result of a preference for a form of equilibrium analysis that gives unqualified support to the ideology of free markets In the case of Marx his theory of exploitation and from this the stress on class struggle led to an almost complete neglect of his contribution to the analysis of the aggregate demand and supply of commodities **Technology, Society, and Conflict** Elena G. Popkova,Manas Chatterji,2022-09-16 Technology Society and Conflict comprehensively studies and systematically highlights technological inequalities as a source of conflict in digital development while developing an economic and legal approach to resolving them
