Remillard,Ok-Kyeong Kim,2020-03-16 The book presents comparative analyses of five elementary mathematics curriculum programs used in the U S from three different perspectives the mathematical emphasis the pedagogical approaches and how authors communicate with teachers These perspectives comprise a framework for examining what curriculum materials are comprised of what is involved in reading and interpreting them and how curriculum authors can and do support teachers in this process Although the focus of the analysis is 5 programs used at a particular point in time this framework extends beyond these specific programs and illuminates the complexity of curriculum materials and their role in teaching in general Our analysis of the mathematical emphasis considers how the mathematics content is presented in each program in terms of sequencing the nature of mathematical tasks cognitive demand and ongoing practice and the way representations are used Our analysis of the pedagogical approach examines explicit and implicit messages about how students should interact with mathematics one another the teacher and the textbook around these mathematical ideas as well as the role of the teacher In order to examine how curriculum authors support teachers we analyze how they communicate with teachers and what they communicate about including the underlying mathematics noticing student thinking and rationale for design elements The volume includes a chapter on curriculum design decisions based on interviews with curriculum authors Global Positioning Systems Laurie Collier Hillstrom,2010-12-06 Many inventions come to us through military and government creation such as Global Positioning Systems or G P S This volume focuses on G P S technology in detail tracing the history and scientific breakthroughs leading to its creation Readers will also consider its impact and its future uses **Activating and Engaging Learners and Teachers** Carmen Amerstorfer,Max von Blanckenburg,2023-03-13 This book offers a nuanced integrated understanding of EFL learning and instruction and investigates both learner and teacher perspectives on four thematically interconnected parts Part I encompasses chapters on psychological aspects related to teaching and learning and presents the latest research on positive language education teacher empathy and well being Part II deals with EFL teaching methodology specifically related to teaching pronunciation language assessment peer response and strategy instruction Part III addresses aspects of cultural learning including inter and transculturality digital citizenship global learning and cosmopolitanism Part IV concerns teaching with literary texts for instance to reflect on social and political discourse facilitate empowerment imagine utopian or dystopian futures and to bring non Western narratives into language classrooms
