Assistive Technologies and Computer Access for Motor Disabilities Kouroupetroglou, Georgios, 2013-08-31

Individuals with disabilities that impede their range of motion often have difficulty accessing technologies. With the use of computer-based assistive technology devices, tools, and services can be used to maintain and improve the functional capabilities of motor disabilities. Assistive Technologies and Computer Access for Motor Disabilities investigates solutions to the difficulties of impaired technology access by highlighting the principles, methods, and advanced technological solutions for those with motor impairments. This reference source is beneficial to academia, industry, and various professionals in disciplines such as rehabilitation science, occupational therapy, human-computer interface development, ergonomics, and teaching in inclusive and special education. This publication is integrated with its pair book, *Disability Informatics and Web Accessibility for Motor Limitations*. **Reconceptualizing STEM Education** Richard A. Duschl, Amber S.

Bismack, 2016-01-08 *Reconceptualizing STEM Education* explores and maps out research and development ideas and issues around five central practice themes: Systems Thinking, Model-Based Reasoning, Quantitative Reasoning, Equity, Epistemic and Ethical Outcomes, and STEM Communication and Outreach. These themes are aligned with the comprehensive agenda for the reform of science and engineering education set out by the 2015 PISA Framework, the US Next Generation Science Standards, and the US National Research Council's *A Framework for K-12 Science Education*. The new practice-focused agenda has implications for the redesign of pre-K-12 education for alignment of curriculum, instruction, assessment, STEM teacher education, and professional development, postsecondary, further, and graduate studies, and out-of-school informal education. In each section, experts set out powerful ideas followed by two eminent discussant responses that both respond to and provoke additional ideas from the lead papers. In the associated website, highly distinguished nationally recognized STEM education scholars and policymakers engage in deep conversations and considerations addressing core practices that guide STEM education. *The Complexities, Key Concepts and Mechanisms of Immunology* Seema Tripathy, Rashmi Rekha
