

Truck Loading Information

1. Recommended location for cargo center of gravity for cargo weight rating (Pickup Truck).

Note: Use rear edge of load floor for measurement purposes.

Example of Proper Truck and Camper Match

1. Camper center of gravity.
2. Recommended center of gravity location zone.

6-05488

68488

CAUTION: The cargo center of gravity is only one of many factors which may affect the truck's overall performance, including handling, steering and braking. The recommended limits for the truck will be driven with reasonable prudence in light of all the existing conditions. Failure to do so could result in unsatisfactory truck performance which could result in personal injury.

For slide-in camper installation and loading instructions, refer to the slide-in camper manufacturer's recommendations.

Any accessories, trailer hitches or other equipment added to this vehicle after final date of manufacture must be weighed. The extra weight should then be deducted from the prescribed cargo weight rating of this

vehicle. This may decrease the permissible longitudinal zone of the center of gravity for this vehicle.

The longitudinal center of gravity zone has been determined for the full cargo weight rating of this vehicle. If a slide-in camper has a total weight less than the cargo weight rating, the permissible longitudinal zone of the center of gravity may be larger. However, individual axle loads should not exceed either of the Gross Axle Weight Ratings (GAWRs).

Secure loose items to prevent weight shifts that affect the balance of your vehicle. When the truck-camper is loaded, drive to a scale and weigh on the front and on the rear wheels separately to determine axle loads. Individual axle loads should not exceed either of the Gross Axle Weight Ratings (GAWRs). The total of the axle loads should not exceed the Gross Vehicle Weight Rating (GVWR). These ratings are given on the Vehicle Certification Label that is located on the rear pillar of the driver's (left hand) door. If weight ratings are exceeded, move or remove items to bring all weights below the ratings.

PICKUP CONVERSION TO CHASSIS CAB

General Motors is aware that some vehicle owners may consider having the pickup box removed and a commercial or recreational body installed. Before you do so, first contact the GM Zone Office for your area for information on such conversions. (See the "Warranty and Owner Assistance" booklet for Zone Office.) Owners should be aware that, as manufactured, there are differences between a chassis cab and a pickup with the box removed which may affect vehicle safety. The components necessary to adapt the pickup to permit its safe use with a specialized body should be installed by a body builder in accordance with the information available from the Zone Office.
