Handbook of Organizational Culture and Climate Neal M. Ashkanasy, Celeste P M Wilderom, Mark F. Peterson, 2000
The Handbook of Organizational Culture and Climate provides an overview of current research theory and practice in this expanding field. The editorial team and the authors come from diverse professional and geographical backgrounds and provide an unprecedented coverage of topics relating to both culture and climate of modern organizations. The Guide to Human Genome Computing is invaluable to scientists who wish to make use of the powerful computing tools now available to assist them in the field of human genome analysis. This Second Edition contains completely updated material. Rather than a revision of the previous volume, the Second Edition is essentially a new book based on the subjects which will be of interest over the coming years. This new book is international both in scope and authorship.
Computing resources for the following are clearly explained: Internet resources, databases, etc. Genetic analysis, Sib pair studies, Comparative mapping, Radiation hybrids, Sequence ready clone maps, Human genome sequencing, ESTs, Gene prediction, Gene expression.

Monitoring Ecological Condition at Regional Scales Shabeg S. Sandhu, Laura Jackson, Kay Austin, Jeffrey Hyland, Brian D. Melzian, Kevin Summers, 2012-12-06
The Environmental Monitoring and Assessment Program was created by EPA to develop the capability for tracking the changing conditions of our natural resources and to give environmental policy the advantages of a sound scientific understanding of trends. Former EPA Administrators recognized early that contemporary monitoring programs could not even quantify simple unknowns like the number of lakes suffering from acid rain, let alone determine if national control policies were benefiting these lakes. Today, adding to acidification impacts are truly complex problems such as determining the effects of climate change, increases in ultraviolet light, toxic chemicals, eutrophication, and critical habitat loss. Also, today the Government Performance and Results Act seeks to have agencies develop performance standards based on results rather than simply on levels of programmatic

activities The charge to EMAP of ecosystems is therefore the same today as it was a with respect to measuring the condition decade ago We welcome the increasing urgency for sound scientific monitoring methods and data by efforts to protect and improve the environment Systematic nationwide monitoring of natural resources is more than anyone program can accomplish however In an era of declining budgets it is crucial that monitoring programs at all levels of government coordinate and share environmental data EMAP resources are dwarfed by the more than 500 million spent on federal monitoring activities each year

Handbook of Principles of Organizational Behavior Edwin Locke, 2011-07-15 There is a strong movement today in management to encourage management practices based on research evidence In the first volume of this handbook I asked experts in 39 areas of management to identify a central principle that summarized and integrated the core findings from their specialty area and then to explain this principle and give real business examples of the principle in action I asked them to write in non technical terms e g without a lot of statistics and almost all did so The previous handbook proved to be quite popular so I was asked to edit a second edition This new edition has been expanded to 33 topics and there are some new authors for the previously included topics The new edition also includes updated case examples updated references and practical exercises at the end of each chapter It also includes a preface on evidence based management The principles for the first edition were intended to be relatively timeless so it is no surprise that most of the principles are the same though some chapter titles include more than one principle This book could serve as a textbook in advanced undergraduate and in MBA courses It could also be of use to practicing managers and not just those in Human Resource departments Every practicing manager may not want to read the whole book but I am willing to guarantee that every one will find at least one or more chapters that will be practically useful In this time of economic crisis the need for effective management practices is more acute than ever
