Both values are essential to individual liberty but they come into conflict in times when civil order is threatened as has been the case from late in the twentieth century with the advent of global terrorism and trans national crime We seek to articulate legally sustainable politically possible and technologically feasible global ethical standards for identity management technology and policies in liberal democracies in the contemporary global security context Although the standards in question are to be understood as global ethical standards potentially to be adopted not only by the United States but also by the European Union India Australasia and other contemporary liberal democratic states we take as our primary focus the tensions that have arisen between the United States and the European Union
