Amazon Com Technical Analysis:

AMAZON STOCK PRICE: VISUALIZATION, FORECASTING, AND PREDICTION USING MACHINE LEARNING WITH PYTHON GUI

Vivian Siahaan, Rismon Hasiholan Sianipar, 2023-06-09 Amazon is an American multinational technology company that is known for its e-commerce cloud computing digital streaming and artificial intelligence services. It was founded by Jeff Bezos in 1994 and is headquartered in Seattle, Washington. Amazon's primary business is its online marketplace where it offers a wide range of products including books, electronics, household items, and more. The company has expanded its operations to various countries and is one of the largest online retailers globally. In addition to its e-commerce business, Amazon has ventured into other areas. It provides cloud computing services through Amazon Web Services (AWS), which offers on-demand computing, power, storage, and other services to individuals, businesses, and governments. AWS has become a significant revenue source for Amazon. Amazon has also made a significant impact on the entertainment industry. It operates Amazon Prime Video, a streaming platform that offers a wide selection of movies, TV shows, and original content. As for Amazon's stock price, it has experienced substantial growth since the company went public in 1997. The stock has been highly valued by investors due to Amazon's consistent revenue growth, market dominance, and innovation. The stock price has seen both ups and downs over the years, reflecting market trends and investor sentiment. The dataset used in this project starts from 14 May 1997 and is updated till 27 Oct 2021. It contains 6155 rows and 7 columns. The columns in the dataset are Date, Open, High, Low, Close, Adj Close, and Volume. In this project, you will involve technical indicators such as daily returns, Moving Average, Convergence Divergence, MACD, Relative Strength Index, RSI, Simple Moving Average, SMA, lower and upper bands, and standard deviation. To perform forecasting based on regression on Adj Close price of Amazon stock price, you will use Linear Regression, Random Forest regression, Decision Tree regression, Support Vector Machine regression, Naïve Bayes regression, K-Nearest Neighbor regression, Adaboost regression, Gradient Boosting regression, Extreme Gradient Boosting regression, Light Gradient Boosting regression, Catboost regression, MLP regression, Lasso regression, and Ridge regression. The machine learning models used to predict Amazon stock daily returns as the target variable are K-Nearest Neighbor classifier, Random Forest classifier, Naïve Bayes classifier, Logistic Regression classifier, Decision Tree classifier, Support Vector Machine classifier, LGBM classifier, Gradient Boosting classifier, XGB classifier, MLP classifier, and Extra Trees classifier. Finally, you will develop a GUI to plot boundary, decision, distribution of features, feature importance, predicted values versus true values, confusion matrix, learning curve, performance of the model, and scalability of the model.

New Technical Indicators in Python Sofien Kaabar, 2021-02-18 What is this book all about This book is a modest attempt at presenting a more modern version of Technical Analysis based on objective measures rather than subjective ones A sizeable chunk of this beautiful type of analysis revolves around technical indicators which is exactly the purpose of this book I believe it is time to be creative and invent our own indicators that fit our profiles Having had more success with custom indicators than conventional ones I have decided to share my findings The following chapters present new indicators that are the fruit of my research as well as indicators created by brilliant people I also include the functions to create the indicators in Python and provide how to best use them as well as back testing results What am I going to gain You will gain exposure to many new indicators and concepts that will change the way you think about trading and you will find yourself busy experimenting and choosing the strategy that suits you the best How is it organized The order of chapters is not important although reading the introductory technical chapter is helpful The book is divided into three parts part 1 deals with trend following indicators part 2 deals with contrarian indicators part 3 deals with market timing indicators and finally part 4 deals with risk and performance indicators What do you mean when you say this book is dynamic and not static This means that everything inside gets updated regularly with new material on my Medium profile I always publish new findings and strategies Make sure to follow me What level of knowledge do I need to follow this book Although a basic or a good understanding of trading and coding is considered very helpful it is not necessary

At the beginning of the book I have included a chapter that deals with some Python concepts but this book is not about Python
