

THE AMAZON RAINFOREST

Physical Geography

The Amazon Rainforest is the largest forest of any kind in the whole world. It covers an incredible 7 million square kilometres: it is more than 40 times larger than the UK! It grows in the tropical basin of the Amazon River (which is either the 1st or 2nd longest river in the world, depending on definition). It is thought that nearly a third (30%) of all of the world's plant and animal species live in

the Amazon Rainforest – it is the most diverse of all the world's rainforests. One square kilometre of Amazon rainforest can have about 90,000 tons of living plants, whilst one in five of all of the world's birds live here.

Human Geography

Indigenous people have lived in the Amazon Rainforest for thousands of years. There are some tribes that still live deep in the rainforest today, some of whom do not make contact with the outside world at all!

This region includes territory belonging to nine nations. Most of the forest is in Brazil, with 60% of the rainforest, followed by Peru with 13%, and Colombia with 10%. Venezuela, Ecuador, Bolivia, Guyana, Suriname and French Guiana have just a small amount of rainforest.

Deforestation of the Amazon is a problem that many people are worried about. More than one fifth of the Amazon rainforest has already been destroyed. The forest which remains is threatened. People who care for the environment warn about the loss of biodiversity. They also point out that releasing the carbon which is stored in the trees will increase global warming. About 200,000 acres of the rainforest are destroyed every day.

Rainforests Nick Hunter, 2014-07-03 Rain Forests are the wettest places on land and are home to so many exotic plants and animals. However, they can be very dangerous places as well. If you had the chance to explore a rain forest, what would you need to know? What would you pack? Who would you want to come with you? This book gives you the knowledge you need to plan your adventure.

Guardians of the Brazilian Amazon Rainforest: Environmental Organizations and Development Luiz C. Barbosa, 2015-05-08 The Amazon region is the focus of intense conflict between conservationists concerned with deforestation and advocates of agro-industrial development. This book focuses on the contributions of environmental organizations to the preservation of Brazilian Amazonia. It reveals how environmental organizations such as Greenpeace, Friends of the Earth, WWF and others have fought fiercely to stop deforestation in the region. It documents how the history of frontier expansion and environmental struggle in the region is linked to Brazil's position in an evolving capitalist world economy. It is shown how Brazil's effort to become a developed country has led successive Brazilian governments to devise development projects for Amazonia. The author analyses how globalization has led to the expansion of international commodity chains in the region, particularly for mineral ores, soybeans and beef. He shows how environmental organizations have politicized these commodity chains as weapons of conservation through boycotting certain products, while other pro-development groups within Brazil claim that such organizations threaten Brazil's sovereignty over its own resources.
