Hartlep, Daniel P. Scott, 2016-08-18 In this important book Nicholas Hartlep and Daniel Scott's detailed analyses on both visual and historical representations of Asian Americans in textbooks and teacher manuals used in our elementary and secondary schools poignantly tell us that generations of children are growing up being fed this single story about Asian Americans As Hartlep and Scott write Asian Americans have once again been constructed as the good minority that can succeed on their own and be used as a political instrument to shame the Blacks for their underachievement and their fight for equality Over and over again the media has been telling a single story about Asian Americans to the public for the past fifty years The consequence of this fabricated story is that it discourages others even Asian Americans themselves from believing in the validity of their struggles Linshi 2014 p 1 **Teaching the American Civil Rights Movement** Julie Buckner Armstrong, 2002 The past fifteen years have seen renewed interest in the civil rights movement Television documentaries films and books have brought the struggles into our homes and classrooms once again New evidence in older criminal cases demands that the judicial system reconsider the accuracy of investigations and legal decisions Racial profiling affirmative action voting districting and school voucher programs keep civil rights on the front burner in the political arena In light of this there are very few resources for teaching the civil rights at the university level This timely and invaluable book fills this gap This book offers perspectives on presenting the movement in different classroom contexts strategies to make the movement come alive for students and issues highlighting topics that students will find appealing Including sample syllabi and detailed descriptions from courses that prove effective this work will be useful for all instructors both college and upper level high school for courses in history education race sociology literature and political science **Textbooks in American Society** Philip G. Altbach, Gail P. Kelly, Hugh G. Petrie, Lois Weis, 1991-09-27 In recent years textbooks have been widely criticized for low standards lack of imaginativeness and insensitivity to racial and gender issues Increasingly they are cited as another weak link in American public education This book goes beyond the headlines to examine how textbooks are produced how they are

selected and what pressures are placed on textbook authors and publishers The book focuses on the relationship of the textbook to the educational system and includes important issues such as the politics of textbook policy the determinants of textbook content the role of textbooks in educational reform and the process of selection at the state level The authors offer current research on textbook policy including perspectives from those directly involved with textbooks from several thoughtful analyses by textbook editors and publishers to the views of California's Superintendent of Public Instruction

Resources in Education, 1997 **Beyond the Boundaries** Georgia A. Persons, 2017-09-29 In the past African American aspirations for political office were assumed to be limited to areas with sizeable black population bases By and large black candidates have rarely been successful in statewide or national elections This has been attributed to several factors limited resources available to African American candidates or identification with a black liberationist ideological thrust Other factors have been a relatively small and spatially concentrated primary support base of black voters and the persistent resistance of many white voters to support black candidates For these reasons the possibility of black candidates winning elections to national office was presumably just a dream Conventional wisdom conceded a virtual cap on both the possible number of black elected officials and the level of elective office to which they could ascend But objective political analysis has not always made sufficient allowances for the more universal phenomenon of individual political ambitions The contributors to this volume explore the ways ambitious individuals identified and seized upon strategies that are expanding the boundaries of African American electoral politics This volume is anchored by a symposium that focuses on new possibilities in African American politics Both the electoral contests of 2006 and the Barack Obama presidential campaign represent an emergent dynamic in American electoral politics Analysts are beginning to agree that the contours of social change now make the electoral successes of black candidates who are perceived as ideologically and culturally mainstream increasingly likely The debate captured in this volume will likely inspire further scholarly inquiry into the changing nature and dimensions of the larger dynamic of race in American politics and the subsequent changing political fortunes of African American candidates American Business Education, 1959
