Handbook of Research on Solutions for Equity and Social Justice in Education Etim, James, Etim, Alice, 2023-03-02 Education's role should further social justice: prepare students to compete for higher social positions, train workers, and engage students so that they become active participants in a democratic society. However, as with many global systems, education has long ago fallen victim to the institutional ailments of systematic oppression and discrimination. In order to promote equity and social justice in education, it is paramount that educators and administrators acknowledge systematic challenges in education and the solutions. The Handbook of Research on Solutions for Equity and Social Justice in Education discusses how teachers and school administrators practice equity and inclusion in their schools. It provides examples of social justice and how it affects society, as well as specific case studies that aim at engendering equity and inclusion for minorities. It further discusses these issues in a global context. Covering topics such as agentic empowerment, social justice in dialogue, and teacher social justice advocacy, this major reference work is a critical resource for faculty and administrators of both K-12 and higher education: preservice teachers, teacher educators, school social workers, and counselors, librarians, government officials, researchers, and academicians.

Global Assessment Report on Disaster Risk Reduction 2013 United Nations, 2013 This publication is the third biennial report coordinated by the United Nations Office for Disaster Risk Reduction (UNISDR). The first and second reports focused primarily on public policy and the role of national and local governments in disaster risk reduction. This current report explores why increasing disaster risks represent a growing problem for the economic and business community at different scales. It examines how paradoxically business investments that aimed to strengthen competitiveness and productivity may have inadvertently contributed to increasing risks. This report seeks to engage businesses in a dialogue on

disaster risk management that goes beyond the current emphasis on response and preparedness and instead identifies opportunities for the creation of shared value for business and society
