

Self-Cleaning

WARNING

To avoid risk of personal injury, do not touch oven vents or areas around vents during self-cleaning. These areas can become hot enough to cause burns.

To avoid risk of smoke damage or fire, clean excess spills from oven interior.

Prepare for Self-clean Cycle

- A small amount of smoke is normal when cleaning. Excess smoke may indicate a faulty gasket or too much food residue has been left in oven. Move birds and small animals susceptible to fumes or smoke to another room.
- Oven should be cleaned before it gets too dirty. Wipe up large spills before self-cleaning.
- Do not use cleaning cycle if oven light cover is not properly in place.

Self-cleaning

1. Prepare oven for self-cleaning.
 - Remove oven racks and all cooking utensils from oven.
 - Clean excess spills from oven interior.
 - Remove items from rangetop and backguard. These areas can become hot during self-cleaning cycle.
2. With oven door closed, move oven door lever located above oven door to right to lock oven door.
 - If oven is too hot before starting self-clean cycle, oven lever will not move to locked position. Allow oven to cool before starting cycle.

Oven Door Lever

3. Turn oven temperature knob to *CLEAN* position.
 - If oven temperature knob is set before oven door lever is moved, *LOCKED* light flashes. Move oven door lever to locked position.
 - *LOCKED* and *OVEN* indicator lights glow.
 - Self-clean cycle lasts for approximately 4 hours. After self-clean cycle, *OVEN* and *LOCKED* lights flash. Turn temperature knob to *OFF* position and move oven door lever to unlocked position.

Interrupt Self-Clean Cycle

1. Turn oven temperature knob to *OFF* position.
2. When oven has cooled to a safe temperature, *LOCKED* light flashes. Door can be unlocked and opened.
 - Do not force door lever open. If door lever is forced, lock can be damaged.

After Self-cleaning Cycle

Turn oven temperature knob to *OFF* position when finished. After oven has cooled *LOCKED* light flashes. Door can be unlocked and opened.
