Polytempic Polymicrotonal Music Peter Alexander Thoenes, 2022-09-08 This book introduces polytempic polymicrotonality as a new musical aesthetic It proposes music with more than one microtonal tuning system and discusses examples from the literature to give an historic framework showing that this tendency has been present throughout human musical history Polytempo is a tool for which polymicrotonal structures can function in relief from its background and it acts as a frame or ground structure that is multidimensional akin to the advancement of perspective in Renaissance art The book has historic significance as it is the only book of its category or genre in music that features polymicrotonality in music composition or production It displays examples of music literature for musical precedence in this area focusing on Charles Ives's Universe Symphony unfinished since 1925 **The Contemporary Violin** Patricia Strange, Allen Strange, 2003-01-21 Written by a composer and a musician The Contemporary Violin offers a unique menu of avant garde musical possibilities that both performers and composers will enjoy exploring Allen and Patricia Strange's comprehensive study critically examines extended performance techniques found in the violin literature of the latter half of the twentieth century Drawing from both published and private manuscripts the authors present extended performance options for the acoustic modified electric and MIDI violin with signal processing and computer related techniques and include more than 400 notated examples The authors begin with bowing techniques and proceed systematically through other aspects of string playing including MIDI technologies Their correspondence and research with many performers and composers the book's extensive

score and text bibliography and the discography of more than 130 recordings make *The Contemporary Violin* a valuable contemporary music reference and guide. An additional benefit is its listing of Internet resources that will keep the reader up to date with recent developments in contemporary performance and composition. With personal anecdotes and sometimes surprising intimacy and humor, these wide ranging conversations represent the diversity of women composing music in the United States from the mid twentieth century into the twenty first. The composers work in a variety of genres including classical, jazz, multimedia or collaborative forms for the stage, film and video games. Their interviews illuminate questions about the status of women composers in America, the role of women in musical performance and education, the creative process and inspiration, the experiences and qualities that contemporary composers bring to their craft and balancing creative and personal lives. Candidly sharing their experiences, advice and views, these vibrant, thoughtful and creative women open new perspectives on the prospects and possibilities of making music in a changing world. **Living Music**, 2004. *The Oxford Handbook of Spectral Music* Amy Bauer, Liam Cagney, William Mason, 2025.
