Amazing Law of Influence Duncan, King, 2010-09-23 You have heard about it in Pay It Forward you've heard about it in Six Degrees of Separation but no single author has given as much consideration to the laws of influence as King Duncan does here This reader friendly book looks at chaos theory how small changes can trigger monumental transformations The example of this theory most often cited is that of Edward Lorenz who discovered in the 1960s that the tiniest movement in the air in one part of the world can produce dramatic changes in weather patterns months later in another part of the world Thus a butterfly flapping its wings in Malibu might set into motion a series of events that could produce a monsoon months later in Malaysia The Law of Influence states that one life touches another and potentially both lives are changed through this change potentially the entire world is changed Even chance events a smile a word spoken at just the right moment or even people like John Howard who helped a young English journalist return home The young journalist was Winston Churchill and the rest is history More important than explaining what the law of influence is this book explains how individuals can use it to create a life worth living and to share the lessons to create families and communities that work together for the greater good Together people aware of and involved with their own influence on others have the potential to make amazing things happen King Duncan is a professional speaker and author of two other books Amazing Grace Humor to Heal Mind Soul and Body and The One Minute Motivator In 1993 he was the national winner of the International Platform Association's prestigious Speaker's Ladder Award He lives in Knoxville Tennessee where he owns and manages his communications company Seven Worlds Corporation Maintenance of a Lobby to Influence Legislation United States. Congress. Senate. Committee on the Judiciary, 1913 **Theories on Law and Ageing** Israel Doron, 2008-09-25 This book is about trying to answer questions These questions were well introduced by Prof Margaret Hall in the opening of her chapter in this book The fundamental idea of law and aging as a discrete category of legal principle and theory is controversial how and why are older adults or seniors or elders the very terminology is controversial and fraught with difficulties a discrete and distinct group for whom special legal thought and treatment is justified For some a category of law and aging is inherently paternalistic suggesting that older persons are like children especially in need of the protection of the law In this sense the argument continues the category itself internalizes ageist presumptions about older adults and is therefore inherently flawed and even harmful If certain older adults are because of physical or mental infirmities genuinely in need of an enhanced level of legal protection this entitlement should be conceptualized in terms of their disability older adults are not a distinct group but an arbitrarily delineated demographic category which contains within it any number of groups that are legitimately distinct for the purposes of legal theory the disabled women persons of colour Aboriginal persons rich and poor etc Indeed the artificial category of older adults may be seen as obfuscating submerging these more meaningful distinctions **The Influence of Law on Sea Power** Daniel Patrick O'Connell, 1975 From the John Holmes Library collection
