New Perspectives in Operations Research and Management Science Y. Ilker Topcu, Şule Önsel Ekici, Özgür Kabak, Emel Aktas, Özay Özaydın, 2022-06-24 This book presents innovative operations research applications in business specifically industrial engineering and its sub disciplines It investigates new perspectives in operations research and management science with regard to research methods the research context and industrial engineering offering readers a broad range of new approaches to management problems The book features the latest work of researchers who have worked with Professor Fusun Ulengin or built upon her work in their academic careers Written in honor of Prof Ulengin this book was edited by her former Ph D students who are now experts in operations research multiple criteria decision making competitiveness logistics and supply chain management Prof Ulengin s impact in academia is visible in the range of topics and methodologies featured in this book Location and transportation problems competitiveness of nations food supply chains debt collection mathematical modelling multiple criteria decision making data envelopment analysis random forests and Bayesian networks

E-Waste: From Generation to Management-Practices, Challenges, and Solutions Prashant Shukla, Sachi Choudhary, P. S. Ranjit, Akarsh Verma, 2025-10-27 This book aims to create a comprehensive guide that explores the lifecycle of electronic waste from its creation to its disposal The main themes and objectives of this book revolve around understanding the various dimensions of e waste management including its environmental social economic and regulatory aspects Through a series of meticulously curated chapters the book navigates through the lifecycle of electronic products from production to disposal and examines the environmental and health impacts associated with improper e waste handling It delves into the legal and regulatory frameworks governing e waste management explores sustainable design principles and circular economy approaches and showcases best practices and case studies from around the globe A key distinguishing feature of this work lies in its comprehensive coverage of e waste management encompassing diverse perspectives and experiences from both developed and developing regions By presenting a rich tapestry of methodologies case studies and practical insights the manuscript offers a nuanced understanding of the challenges and opportunities in e waste management tailored to the needs of researchers practitioners policymakers and stakeholders alike Furthermore it adopts an interdisciplinary approach drawing upon insights from environmental science engineering policy studies economics and sociology to provide a holistic understanding of e waste management It embraces innovation and sustainability as guiding principles encouraging readers to explore novel solutions and collaborative approaches in tackling the global e waste crisis

Representation Theorems in Computer Science Özgür Lütfü Özçep, 2019-07-16 Formal specifications are an important tool for the construction verification and analysis of systems since without it is hardly possible to explain whether a system worked correctly or showed an expected behavior This book proposes the use of representation theorems as a means to develop an understanding of all models of a specification in order to exclude possible unintended models demonstrating the

general methodology with representation theorems for applications in qualitative spatial reasoning data stream processing and belief revision For qualitative spatial reasoning it develops a model of spatial relatedness that captures the scaling context with hierarchical partitions of a spatial domain and axiomatically characterizes the resulting relations It also shows that various important properties of stream processing such as prefix determinedness or various factorization properties can be axiomatized and that the axioms are fulfilled by natural classes of stream functions The third example is belief revision which is concerned with the revision of knowledge bases under new potentially incompatible information In this context the book considers a subclass of revision operators namely the class of reinterpretation operators and characterizes them axiomatically A characteristic property of reinterpretation operators is that of dissolving potential inconsistencies by reinterpreting symbols of the knowledge base Intended for researchers in theoretical computer science or one of the above application domains the book presents results that demonstrate the use of representation theorems for the design and evaluation of formal specifications and provide the basis for future application development kits that support application designers with automatically built representations

Causes, Impacts and Solutions to Global Warming Ibrahim Dincer, Can Ozgur Colpan, Fethi Kadioglu, 2013-10-29 Global Warming Causes Impacts and Solutions covers all aspects of global warming including its causes impacts and engineering solutions Energy and environment policies and strategies are scientifically discussed to expose the best ways to reduce global warming effects and protect the environment and energy sources affected by human activities The importance of green energy consumption on the reduction of global warming energy saving and energy security are also discussed This book also focuses on energy management and conservation strategies for better utilization of energy sources and technologies in buildings and industry as well as ways of improving energy efficiency at the end use and introduces basic methods for designing and sizing cost effective systems and determining whether it is economically efficient to invest in specific energy efficiency or renewable energy projects and describes energy audit producers commonly used to improve the energy efficiency of residential and commercial buildings as well as industrial facilities These features and more provide the tools necessary to reduce global warming and to improve energy management leading to higher energy efficiencies In order to reduce the negative effects of global warming due to excessive use of fossil fuel technologies the following alternative technologies are introduced from the engineering perspective fuel cells solar power generation technologies energy recovery technologies hydrogen energy technologies wind energy technologies geothermal energy technologies and biomass energy technologies These technologies are presented in detail and modeling studies including case studies can also be found in this book

Energy Systems and Management Ali Nezihi Bilge, Ayhan Özgür Toy, Mehmet Erdem Günay, 2015-03-25 Readers of this work will find examinations of the current status and future status for energy sources and technologies their environmental interactions and the relevant global energy policies The work begins with an overview of Energy Technologies for a Sustainable Future which examines the correlation between population

economy and energy consumption in the past and reviews the conventional and renewable energy sources as well as the management of them to sustain the ever growing energy demand in the future The rest of the chapters are divided into 3 parts the first part of the book Energy Sources Technologies and Environment consists of 12 chapters which include research on new energy technologies and evaluation of their environmental effects The second part Advanced Energy Materials includes 7 chapters devoted to research on material science for new energy technologies The final section titled Energy Management Economics and Policy is comprised of 10 chapters about planning controlling and monitoring energy related processes together with the policies to satisfy the needs of increasing population and growing economy The chapters are selected works from the International Conference on Energy and Management which was organized by Istanbul Bilgi University Department of Energy Systems Engineering and PALMET Energy to share the knowledge on the recent trends scientific developments innovations and management methods in energy and held on 5 7th June 2014 at Istanbul Bilgi University

Artificial Intelligence for Molecular Biology Muhammad Nabeel Asim,Sheraz Ahmed,Andreas Dengel,2025-11-29 Molecular biology is at the forefront of scientific discovery unraveling the intricacies of life at the most fundamental level As biological systems become increasingly complex and data rich artificial intelligence AI has emerged as a pivotal tool for unlocking new insights and enhancing our understanding of these systems This first volume focuses on the core principles of molecular biology while introducing AI driven approaches to genomic and proteomic sequence analysis It serves as a foundation for integrating computational methodologies into the study of biological systems The chapters in this volume are structured to provide a comprehensive overview of the essential concepts tools and methodologies in molecular biology enriched by the latest advancements in AI Fundamentals of Molecular Biology This chapter delves into the foundational elements of molecular biology exploring the central dogma gene expression regulation cellular organization and the evolution of genome studies It also highlights the role of computational biology in complementing traditional experimental techniques DNA RNA Protein Structures Understanding the structural intricacies of DNA RNA and proteins is crucial for comprehending their functions

This chapter outlines their fundamental properties and sets the stage for discussing AI driven sequence analysis Exploration of AI Driven Genomic and Proteomic Sequence Analysis Landscape This section provides an in depth look at how AI is reshaping the field of sequence analysis Topics include representation learning feature engineering predictive modeling and an evaluation of performance metrics for AI driven pipelines Insights of Biological Databases Biological data is the backbone of molecular biology research This chapter discusses the structure organization and utilization of key databases emphasizing data formats redundancy issues and retrieval systems DNA RNA Sequence Representation Learning Methods Representing nucleotide sequences in ways that AI models can process effectively is a critical challenge This chapter explores various encoding methods from nucleotide distributions to Fourier transformations providing a robust toolkit for researchers Protein Sequence Representation Learning Methods Similar to nucleic acid sequences encoding protein sequences requires sophisticated techniques This section details diverse methodologies including physicochemical properties z scales and context aware encodings CRISPR System and AI Applications CRISPR technology has revolutionized genetic editing and AI is accelerating its potential This chapter examines AI driven approaches to CRISPR related tasks from predictive modeling to dataset development emphasizing the synergy between these transformative technologies Through this volume readers will gain a solid understanding of molecular biology and its convergence with AI The interdisciplinary approach ensures that the biological complexities are complemented by computational rigor laying the groundwork for the second volume which delves deeper into advanced AI applications in molecular biology
