

- 10) Choose one of the other substances from the menu on the right.
Experiment by adding and removing heat to the particles.
Draw and describe the substance in the table below.

Substance Chosen:

Neon

	Solid	Liquid	Gas
Diagram of the particles			
Description of particles (speed, movement, bouncing, etc.)	Slow, orderly, and close together. Very little movement. Only vibrating slightly.	Particles begin moving more and spreading out in the container. Higher energy.	Extremely high energy. Particles are spread out and bouncing all over the container.

- 10) Are particles in the solid state still moving? If so, how would you describe that movement?

Particles in the solid state are still moving, but only very slightly. The movement appears more like a vibration.

- 11) What happens to the behavior gas particles when more and more heat is added?

As more heat is added to particles in the gas state, their movement becomes more disorderly and energetic. They bounce even more quickly against the container.

- 12) What is the most notable difference between particles in the solid phase and the liquid phase?

Particles in the liquid phase contain more energy from heat. This causes the particles to spread out more and spin more quickly than particles in the solid state.

Information and Communication Technologies in Education, Research, and Industrial Applications Vadim Ermolayev, Igor Potapov, Oleksii Ignatenko, Roman Hornung, Andrii Hlybovets, Vitaliy Yakovyna, Yaroslav Prytula, Oleksandr Spivakovsky, 2025-02-25 This book constitutes the proceedings of the 19th International Conference on Information and Communication Technologies in Education Research and Industrial Applications ICTERI 2024 held in Lviv Ukraine during September 23-27, 2024. The 29 full papers, 2 short papers and 3 keynote papers included in this volume were carefully reviewed and selected from 83 submissions. They were organized in topical sections as follows: main conference, PhD symposium and research in progress. *Utilizing ICT for Didactics of Social and Experimental Sciences* Delgado-Algarra, Emilio José, Lorca-Marín, Antonio Alejandro, 2024-10-17 Technological advances allow for improved immersion experiences using information and communication technologies (ICTs) and their respective didactic possibilities. On the other hand, with the expansion of internet, mobile applications and video games, they have become common use in student educational environments. By integrating digital tools and resources into the curriculum, teachers can create interactive and immersive learning experiences that cater to diverse learning styles and foster critical thinking skills. Harnessing new technology may allow educators to enrich their classrooms while preparing students to navigate the digital world, bridging the gap between theoretical knowledge and practical application in social and experimental sciences. *Utilizing ICT for Didactics of Social and Experimental Sciences* explores the benefits of using information and communication technology in social and experimental sciences. It includes strategies and resources such as virtual reality, augmented reality, videogames and virtual classrooms that can transform social sciences teaching and learning and society. This book covers topics such as digital technology, virtual reality and gamification and is a useful resource for computer engineers, scientists, sociologists, education professionals, academicians and researchers. *Handbook on Personalized Learning for States, Districts, and Schools* Marilyn Murphy, Sam Redding, Janet Twyman, 2016-07-01 The recent passage of the Every Student Succeeds Act (ESSA) presents new opportunities and greater flexibility in efforts to personalize learning for all children. The *Handbook on Personalized Learning for States, Districts, and Schools* provides insight and guidance on maximizing that new flexibility. Produced by the Center on Innovations in Learning (CIL), one of seven national content centers funded by the U.S. Department of Education, this volume suggests how teachers can enhance personalized learning by cultivating relationships with students and their families to better understand a child's learning and motivation. Personalized learning also encourages the development of students' metacognitive, social and emotional competencies, thereby fostering students' self-direction in their own education, one aimed at mastery of knowledge and skills and readiness for career and college. Chapters address topics across the landscape of personalized learning, including co-designing instruction and learning pathways with students, variation in the time, place and pace of learning, including flipped and blended classrooms, and using technology to manage and analyze the learning process.

The Handbook's chapters include Action Principles to guide states, districts, and schools in personalizing learning. [College Physics Textbook Equity Edition Volume 2 of 3: Chapters 13 - 24](#) An OER from Textbook Equity, 2016-02-11. This text is intended for one-year introductory courses requiring algebra and some trigonometry but no calculus. College Physics is organized such that topics are introduced conceptually with a steady progression to precise definitions and analytical applications. The analytical aspect of problem solving is tied back to the conceptual before moving on to another topic. Each introductory chapter, for example, opens with an engaging photograph relevant to the subject of the chapter and interesting applications that are easy for most students to visualize. Learners through Science Teacher Education Michele Koomen, Sami Kahn, Christopher L. Atchison, Tiffany A. Wild, 2018-05-16. *Towards Inclusion of All Learners through Science Teacher Education* serves as an indispensable resource for teachers and teacher educators wishing to understand how to educate students with exceptionalities in science. This book begins with the voices and stories of the experts: current and former K-12 students with disabilities sharing their experiences in science education classrooms. The voices of students with disabilities are then connected to the work of leading experts in the area of science education for individuals with disabilities in an effort to address the goals of national reform documents by ensuring rigorous science experiences for all students. It is written in a highly accessible and practical manner, making it ideal for all educators, including pre-service and in-service teachers, teacher educators, researchers, and curriculum developers.

[Arguing From Evidence in Middle School Science](#) Jonathan Osborne, Brian M. Donovan, J. Bryan Henderson, Anna C. MacPherson, Andrew Wild, 2016-08-30. *Teaching your students to think like scientists* starts here. Use this straightforward, easy-to-follow guide to give your students the scientific practice of critical thinking. Today's science standards require ready-to-implement strategies and activities that help you effortlessly engage students in arguments about competing data sets, opposing scientific ideas, applying evidence to support specific claims, and more. Use these 24 activities drawn from the physical sciences, life sciences, and earth and space sciences to engage students in 8 NGSS science and engineering practices. Establish rich, productive classroom discourse. Extend and employ argumentation and modeling strategies. Clarify the difference between argumentation and explanation. Stanford University professor Jonathan Osborne, co-author of *The National Resource Council's A Framework for K-12 Science Education*, the basis for the Next Generation Science Standards, brings together a prominent author team that includes Brian M.
