Introduction to Metametaphysics Tuomas E. Tahko, 2015-11-12 This is the first systematic student introduction to metametaphysics examining the nature foundations and methodology of metaphysical inquiry **Norms and Necessity** Amie Lynn Thomasson, 2020 Philosophical theories often hinge on claims about what is necessary or possible But what are possibilities and necessities and how could we come to know about them This book aims to help demystify the methodology of philosophy by treating such claims not as attempted descriptions of strange facts or distant possible worlds but rather as ways of expressing rules or norms **Ontology After Carnap** Stephan Blatti, Sandra Lapointe, 2016 Rudolf Carnap's deflationary approach to ontology is once again attracting considerable interest and support Eleven original essays by leading voices in metametaphysics deepen our understanding of Carnap's contributions to metaontology and explore how his legacy can be mined for insights into the contemporary debate **Nietzsche as Metaphysician** Justin Remhof, 2022-11-18 This book defends the controversial view that Nietzsche is a metaphysician against a long standing tendency to sever Nietzsche from metaphysical philosophy Remhof presents a metametaphysical treatment of Nietzsche's writings to show that for Nietzsche the questions answers methods and subject matters of metaphysical philosophy are not only perfectly legitimate but also crucial for understanding the world and our place within it The book examines aspects of Nietzsche's thought that have received little attention in the literature including his view of what makes metaphysics possible his metaphysics of science his naturalized metaphysics how he appeals to the intuitions of readers how he employs a priori reasoning how he uses metaphysical grounding explanations and how metaphysics is intertwined with topics central to his philosophical thinking including his understanding of becoming ethics nihilism life perspective amor fati and eternal recurrence Nietzsche as Metaphysician will be of interest to scholars and advanced students working on Nietzsche and the history of metaphysics **Thomasson on Ontology** Miguel Garcia-Godinez, 2023-06-10 Amie L Thomasson the Daniel P Stone Professor of Intellectual and Moral Philosophy at Dartmouth College has gained international recognition as a leading figure

within various areas of philosophy She has recently been celebrated as one of the most influential living philosophers for her significant contributions to metaphysics ontology phenomenology and aesthetics By engaging critically with her approach to metaphysics modality conceptual analysis and the methodological issues concerning ontological questions about ordinary objects social entities and fictional characters as well as including a chapter from Thomasson herself where she makes explicit the internal connections which run through her body of work this volume delivers the first thorough discussion of Thomasson's philosophy

Metametaphysics David Chalmers, David Manley, Ryan Wasserman, 2009-02-19 Metaphysics asks questions about existence for example do numbers really exist Metametaphysics asks questions about metaphysics for example do its questions have determinate answers If so are these answers deep and important or are they merely a matter of how we use words What is the proper methodology for their resolution These questions have received a heightened degree of attention lately with new varieties of ontological deflationism and pluralism challenging the kind of realism that has become orthodoxy in contemporary analytic metaphysics This volume concerns the status and ambitions of metaphysics as a discipline It brings together many of the central figures in the debate with their most recent work on the semantics epistemology and methodology of metaphysics

Rules for the Inquiring Mind Luis Rosa, 2024-09-30 This book concerns the nature and the norms of inquiry It tackles not only philosophical issues regarding what inquiry is but also issues regarding how it should and should not be executed Roughly put inquiry is the activity of searching for the true answers to questions of our interest But what is the difference between empirical and armchair inquiry And what are the right and the wrong ways to inquire Under what conditions should one start inquiring Which questions are such that one should not inquire into them The book offers answers to these questions It argues that competent armchair inquiry only makes explicit what was already implicit the inquirer already had the answer to her question before inquiring into it though this was not explicit to her It also argues that we should avoid inquiring into questions whose answers are unknowable to us in the instrumental sense of should and that different modes of inquiry are called for depending on which type of information is available to the subject These answers are rigorously argued for and they stem from a unified framework for modeling the activity of inquiry

Oxford Studies in Philosophy of Mind Uriah Kriegel, 2024-09-21 Oxford Studies in Philosophy of Mind presents cutting edge work in the philosophy of mind combining invited articles and articles selected from submissions Each volume will highlight two themes to bring focus to debates The series will reflect the diversity of methods adopted in contemporary philosophy of mind and provide a venue for rigorous and innovative work by both established and up and coming voices in the field The themes covered in the fourth volume are twenty first century idealism acquaintance and perception and acquaintance and consciousness It also contains a book symposium on David Chalmers Reality and an article on Aristotle's philosophy of mind

Philosophical Methodology: The Armchair or the Laboratory? Matthew C. Haug, 2013-07-31 What methodology should philosophers follow Should they rely on methods that can be conducted from the

armchair Or should they leave the armchair and turn to the methods of the natural sciences such as experiments in the laboratory Or is this opposition itself a false one Arguments about philosophical methodology are raging in the wake of a number of often conflicting currents such as the growth of experimental philosophy the resurgence of interest in metaphysical questions and the use of formal methods This outstanding collection of specially commissioned chapters by leading international philosophers discusses these questions and many more It provides a comprehensive survey of philosophical methodology in the most important philosophical subjects metaphysics epistemology philosophy of language philosophy of mind phenomenology philosophy of science ethics and aesthetics A key feature of the collection is that philosophers discuss and evaluate contrasting approaches in each subject offering a superb overview of the variety of methodological approaches both naturalistic and non naturalistic in each of these areas They examine important topics at the heart of methodological argument including the role of intuitions and conceptual analysis thought experiments introspection and the place that results from the natural sciences should have in philosophical theorizing The collection begins with a fascinating exchange about philosophical naturalism between Timothy Williamson and Alexander Rosenberg and also includes contributions from the following philosophers Lynne Rudder Baker Matt Bedke Greg Currie Michael Devitt Matthew C Haug Jenann Ismael Hilary Kornblith Neil Levy E J Lowe Kirk Ludwig Marie McGinn David Papineau Matthew Ratcliffe Georges Rey Jeffrey W Roland Barry C Smith Amie L Thomasson Valerie Tiberius Jessica Wilson and David W Smith
