A History of Cyber Literary Criticism in China Ouyang Youquan, 2023-08-18 This is the first scholarly attempt to write a history of cyber literary criticism in China. The author uses the Internet as the departure point, literature as the horizontal axis, and criticism as the vertical axis to draw a detailed trajectory of the development of cyber literary criticism in China. The book comprises two parts. The first part focuses on the representation of historical facts about cyber literary criticism, covering five topics: the evolution of cyber literary criticism in the context of the new media, major types of cyber literary critics, and their criticism, academic achievements in cyber literary studies, the form, contents, and rhetorical expressions of so-called netizens' critical commentaries, and important events in the history of cyber literary criticism. The second part discusses the historical changes in literary criticism as responses to cyber literature, covering another five topics: the conceptual transformation in literary criticism of the Internet era, the establishment of evaluation criteria for cyber literature, changes in the function of cyber literary criticism, changes in the constitution of cyber literary critics, and the impact of cyber literary criticism. This book will be an essential read to students and scholars of East Asian Studies, literary criticism, and those who are interested in cyber literature in general.

Olson, 2022-03-17 How can shadows determine the date and time of a painting by Johannes Vermeer? How did the Moon and tides cause the loss of King John's crown jewels? In his newest book, Professor Olson, author of *Celestial Sleuth* and *Further Adventures of the Celestial Sleuth*, explores how astronomical clues can uncover fascinating new details about art, history, and literature. He begins with an accessible introduction to amateur celestial sleuthing, showing how to use your astronomical knowledge, software, archives, vintage maps, historical letters and diaries, military records, and other resources to investigate the past. Follow along as Professor Olson then explores twenty real-world cases where astronomy has helped answer unresolved questions or correct longstanding interpretations about an event. Examples involve artists such as Vermeer, Monet, and O'Keeffe; the historical exploits of Alexander the Great; the desert travels of the Death Valley 49ers; and a

meeting between Franklin D Roosevelt and Winston Churchill in Marrakech and literary works by Chaucer Shakespeare and Longfellow Packed with dozens of full color illustrations this book will enrich your knowledge of the past and equip you with all the tools you ll need to become a celestial sleuth yourself Many people have a passion for art or world history or great literature or even astronomy but seldom in all these things at once This remarkable book by Donald Olson of Texas State University will put you in touch with such seemingly unrelated endeavors It will open your eyes and broaden your mind as little else could Roger W Sinnott Sky Telescope ENC Focus ,2000 Mathematics & Science in the Real World ,2000

is an indispensable reference for scholars and students studying any aspect of the region's past. Starting with the de Soto map of 1544, the earliest document that purports to describe anything about the Great Smoky Mountains, and continuing through 1934 with the establishment of the Great Smoky Mountains National Park, today the most visited national park in the United States, this volume catalogs books, periodical and journal articles, selected newspaper reports, government publications, dissertations, and theses published during that period. This bibliography treats the Great Smoky Mountain Region in western North Carolina and east Tennessee systematically and extensively in its full historic and social context. Prefatory material includes a timeline of the Great Smoky Mountains and a list of suggested readings on the era covered. The book is divided into thirteen thematic chapters, each featuring an introductory essay that discusses the nature and value of the materials in that section. Following each overview is an annotated bibliography that includes full citation information and a bibliographic description of each entry. Chapters cover the history of the area, the Cherokee in the Great Smoky Mountains, the national forest movement, and the formation of the national park, life in the locality, Horace Kephart, perhaps the most important chronicler to document the mountains and their inhabitants, natural resources, early travel, music, literature, early exploration, and science, maps, and recreation and tourism.
