Flow Cytometry Ranbir Chander Sobti,Awtar Krishan,Devendra K. Agrawal,2024-12-24

Flow cytometry is a state of the art technology that is widely used in biological research and clinical diagnostics It is a high throughput platform that allows the quantification differentiation and functional study of cells or cell like particles in suspension Various cell components can be targeted with fluorescently labelled antibodies or fluorescent dyes to allow measurement and analysis of the physical chemical and biological properties of individual cells within homogenous or heterogeneous populations Since its commercialization more than five decades ago flow cytometry has advanced and become an very important analytical tool in translational research With the advancement of instrument technology an increasing number of fluorescent dyes and an expanding range of monoclonal antibodies the applications of flow cytometry in applied research continue to grow The use of multiparametric flow cytometry in translational research provides the ability to rapidly identify different cell populations and to simultaneously measure multiple parameters of single cells for efficiently assessing immune status decrease increase of specific immune cell populations cell activation status etc of different cells in preclinical and clinical studies The primary goal of any research work is to take research results from the bench to bed and back The use of flow cytometry in applied research advances the development of new diagnostic tests or drugs for cancer treatment immune monitoring etc that help in patient care Today every biological scientist needs to have basic knowledge of flow cytometry in order to utilise this technology properly in their own research and to understand other s research work The present book has been designed to give the knowledge of flow cytometry and its applications to the researchers and teachers

It will allow the readers to utilize the technology in an appropriate way in their research work This book has describing various applications of flow cytometry like cell health monitoring immunophenotyping cell sorting stem cell characterization micro vesicle analysis etc Dietary Modulation of Cell Signaling Pathways Zigang Dong,Young-Joon Surh,2008-09-26 A consequence of rapid progress in the science of nutrigenomics and nutrigenetics is the substantial accumulation of data covering nutritional modulation of gene expression at the cellular and subcellular levels Current research is increasingly focused on the role of nutrition and diet in modifying oxidative damage in the progression of disease Die **Leishmaniasis: Control and Elimination** Om Prakash Singh,Rajiv Kumar,Christy Petersen,Shyam Sundar,Epke Le Rutte,2022-02-07
