Stephan Blatti, Sandra Lapointe

Answerable And Unanswerable Questions Amie Thomasson:

An Introduction to Metametaphysics Tuomas E. Tahko, 2015-11-12 This is the first systematic student introduction to metametaphysics examining the nature foundations and methodology of metaphysical inquiry Ontology After Carnap Stephan Blatti, Sandra Lapointe, 2016 Rudolf Carnap's deflationary approach to ontology is once again attracting considerable interest and support Eleven original essays by leading voices in metametaphysics deepen our understanding of Carnap's contributions to metaontology and explore how his legacy can be mined for insights into the contemporary debate

Objects Daniel Z. Korman, 2015 One of the central questions of material object metaphysics is which highly visible objects there are right before our eyes Daniel Z Korman defends a conservative view according to which our ordinary natural judgments about which objects there are are more or less correct He begins with an overview of the arguments that have led people away from the conservative view into revisionary views according to which there are far more objects than we ordinarily take there to be permissivism or far fewer eliminativism Korman criticizes a variety of compatibilist strategies according to which these revisionary views are actually compatible with our ordinary beliefs and responds to debunking arguments according to which these beliefs are the products of arbitrary biological and cultural influences He goes on to respond to objections that the conservative's verdicts about which objects that are and aren't are objectionably arbitrary and to the argument from vagueness which purports to show that the sort of restriction that conservatives want to impose on which composites there are is bound to give rise to vagueness about what exists something that is ruled out by widely accepted theories of vagueness Finally Korman responds to the overdetermination argument the argument from material constitution and the problem of the many all of which are meant to motivate eliminativism by showing that accepting ordinary objects commits one to one or another absurdity **Foundations of Metaphysics** Chad Carmichael, 2008

Fictional Objects Stuart Brock, Anthony Everett, 2015-06-04 Eleven original essays discuss a range of puzzling philosophical questions about fictional characters and more generally about fictional objects For example they ask questions like the following Do they really exist What would fictional objects be like if they existed Do they exist eternally Are they created Who by When and how Can they be destroyed If so how Are they abstract or concrete Are they actual Are they complete objects Are they possible objects How many fictional objects are there What are their identity conditions What kinds of attitudes can we have towards them This volume will be a landmark in the philosophical debate about fictional objects and will influence higher level debates within metaphysics the philosophy of mind and the philosophy of language
