II. Complete the following scheme of blood circulation in the human body.

Oxygen-poor blood enters the right atrium through the tricuspid valve to the right ventricle. Through the pulmonary valve, blood is pumped to the pulmonary trunk then to the left pulmonary artery reaching capillary beds of the lungs. From the lungs, oxygen rich blood goes and enters to the pulmonary veins to the left atrium of the heart then through the bicuspid valve to the chamber called left ventricle. Oxygen rich blood will exit the heart through the aortic valve to the largest artery called aorta. Blood will reach the systemic arteries to the capillaries of the tissues to the systemic veins to the superior vena cava and inferior vena cava returning to the right atrium of the heart.

III. Identify the different types of blood vessels in the picture.

Cardiovascular System: Questions and Answers: An Aid for Learners Urban John Arnold D'Souza, Mohd Firdaus bin Mohd Hayati, Firrul bin Masnah @ Kadir, Nornazirah binti Azizan, Vishnudas Prabhu, 2021-08-19 This short book focuses on the possible examination questions and their answers on the cardio vascular system In the era of modern technology and the internet of things student learning has gone beyond the approved textbooks and teachers due to the overload of information that is easily available on the internet using different search engines The trend and fashion are so deep rooted to the extent that the Google search engine is the Bible for everyone These days students do a common mistake of going through information overload and assuming the information available on the web as knowledge It is very well true for medical students information overload confuses the mind and focus of study This book aids a learner of the cardiovascular system to know the appropriate depth of knowledge that one needs to know In the evaluation based academic assessment student knowledge is measured by different methods of assessment tools such as written examinations such as long essay short essay viva voce etc This book provides comprehensive and concise knowledge based on a question so that a student develops an awareness that helps to frame the answer required for a question *101 Questions about Blood and Circulation, 2nd Edition* Faith Hickman Brynie, 2013-01-01 As in previous books in this critically acclaimed series Brynie polled hundreds of high school students across the country to find out what they wanted to know most about blood and circulation Using an accessible question and answer format Brynie helps readers discover and learn facts about the blood and circulation in human body Brynie appealing and clear writing style makes learning about blood and circulation as easy as donating blood to the blood bank **Crash Course Cardiovascular System Updated Edition - E-Book** Jonathan Evans, 2015-01-12 Crash Course your effective every day study companion PLUS the perfect antidote for exam stress Save time and be assured you have all the core information you need in one place to excel on your course and achieve exam success A winning formula now for over 15 years each series volume has been fine tuned and fully updated with an improved layout tailored to make your life easier Especially written by senior medical students or recent graduates those who have just been in the exam situation with all information thoroughly checked and quality assured by expert faculty advisers the result are books which exactly meet your needs and you know you can trust Commencing with Learning Objectives every chapter guides you succinctly through the topic giving full coverage of the curriculum whilst avoiding unnecessary and often confusing detail Cardiovascular disease is the leading cause of death in the western world and a common cause of hospital admission This highly accessible guide to the cardiovascular system highlights all the essential information to provide an invaluable foundation for application to clinical practice in this most fundamental of medical specialties Almost 160 illustrations present clinical diagnostic and practical information in an easy to follow manner Friendly and accessible approach to the subject makes learning especially easy Written by students for students authors who understand exam pressures Contains Hints and Tips boxes and other

useful aide m moires Succinct coverage of the subject enables sharp focus and efficient use of time during exam preparation Contains a fully updated self assessment section ideal for honing exam skills and self testing Self assessment section fully updated to reflect current exam requirements Contains common exam pitfalls as advised by faculty Crash Courses also available electronically Online self assessment bank also available content edited by Dan Horton Szar *The Cardiovascular System* John Thompson Shepherd, Stephen R.. Geiger, François M. Abboud, 1983 *The Cardiovascular System* American Physiological Society (1887-), 1983 *Cardiovascular Physiology Concept* Hannah Ramirez, 2020-08-23 Cardiovascular Physiology Concept Short Book Description An Introduction to Cardiovascular Physiology provides the student with the key concepts of cardiovascular physiology Cardiovascular Physiology Questions for Self Assessment With Illustrated Answers Cardiovascular Physiology Concept full Book Description Overview of the cardiovascular system The cardiac cycle Cardiac myocyte excitation and contraction Initiation and nervous control of heart beat Electrocardiography and arrhythmias Control of stroke volume and cardiac output Assessment of cardiac output and peripheral pulse Haemodynamics flow pressure and resistance The endothelial cell The microcirculation and solute exchange Circulation of fluid between plasma interstitium and lymph Vascular smooth muscle excitation contraction and relaxation Control of blood vessels I Intrinsic control Control of blood vessels II Extrinsic control by nerves and hormones Specialization in individual circulations Cardiovascular receptors reflexes and central control Co ordinated cardiovascular responses Cardiovascular responses in pathological situations The aim of this collection of over 230 questions is to offer students an element of self assessment as they progress through the companion book or revise for examinations Lecturers may find some of the questions useful as a template when setting questions of their own but should note that the questions are primarily educational in intent their discriminatory power has not been tested The questions are grouped under the same headings as the chapters of the companion textbook so they become progressively more advanced see Contents Occasional statements call for information from later chapters Medically relevant questions are introduced wherever they are appropriate I have set at least one question on each learning objective given at the start of the chapter in the companion volume to help you assess your achievement of the learning objectives Some questions require you to integrate information from other chapters too The questions aim to test basic understanding fundamental principles and medical relevance Hopefully they avoid excessive detail always the examiner s easy option The questions Most of the questions are multiple choice questions MCQs generally with five true false statements but occasionally more or less than five Although some educationalists now demand single correct answer questions SAQs one correct answer out of four or five options these test less knowledge so the MCQ style has been retained here To add variety there is a sprinkling of other styles of question such as extended matching questions i e choose the best answer from a list data interpretation problems and little numerical problems that test reasoning power and ability to do simple calculations The answers Each answer is accompanied by a brief explanation and very often an illustrative figure which should help if you

got the answer wrong Most of the figures are from the accompanying textbook but there are also new explanatory diagrams after some questions It is sometimes difficult to avoid ambiguity in MCQ questions so use your common sense choose the answer that will be right most of the time rather than a remote rare possibility Nevertheless if you disagree with the official answer do let me know
