Ditto for countless less iconic firms and small businesses. At a high level, executives and managers at these organizations are trying to turn back the clock to 2019. There's just one problem, though: For a bevy of reasons, they won't succeed. In many ways, the workplace of 2023 already differs from its pre-pandemic counterpart. In some cases, it's downright unrecognizable. What's more, this gap will only intensify in the coming years. Blame, or thank, if you like, powerful economic, societal, geopolitical, and technological forces. They include generative AI, automation, dispersed workforces, blockchain, immersive technologies, employee empowerment, and the return of systemic inflation. Brass tacks: The workplace is undergoing a massive, irrevocable shift. The only question for business leaders is: What should you do about it? In **The Nine: The Tectonic Forces Reshaping the Workplace**, award-winning author and world-renowned workplace tech expert Phil Simon answers that question in spades. He peers into the dizzying and chaotic future of work. Simon slices through the hype surrounding nascent

trends and newfangled technologies Insightful timely and essential The Nine clearly explains what's really happening why and how business leaders can navigate the dramatically different workplace of the future
