Good Faith in Long-Term Relational Supply Contracts in the Context of Hardship from A Comparative Perspective Peng Guo, 2021-11-09 This book provides fair and acceptable solutions to hardship issues in long term relational supply contracts This book uses an approach to strike a balance between the traditional approach underlying classical contract law which emphasises the almost absolute prevalence of the principle of pacta sunt servanda

and a flexible approach that is based on the principle of *clausula rebus sic stantibus*. This book argues for an emerging principle of *pacta sunt servanda bona fide* on the basis of the relational contract theory. Additionally, this book demonstrates how good faith can serve as a foundation for imposing a duty to renegotiate on the parties. The aim of this book is rather to propose how relational contract theory can be applied to the analysis of specific legal rules in general. Lastly, this book highlights how the duty to renegotiate and the power to adapt a contract can be further developed upon the occurrence of hardship based on good faith and the relational nature and characteristics of a long term relational supply contract. This book explores and enriches the existing research on relational contract theory, concentrates primarily on its application in domestic contract laws, particularly in the regulation of long term contracts in American contract law. As an outcome, this book provides a more feasible and satisfactory approach for courts or arbitral tribunals to undertake when facing hardship issues in international contract disputes. Overall, hardship, long term relational supply contracts, and good faith are examined extensively.

Yearbook Maritime Law Ignacio Arroyo, 2013-04-18. The importance of legal questions related to the sea is obvious to everyone. It is hardly surprising that the subjects that make up international current events illustrate the leading role played by maritime affairs. Indeed, it is no coincidence that three quarters of the earth's surface is covered by oceans. Territorial seas, exclusive economic zones, exploitation of the seabed, fishing, transport, insurance, collision, and pollution raise many unresolved questions. On the other hand, the contrast of this importance with the modest attention that existing periodical publications merit must be underscored. Without undervaluing these publications, there has been a need for some time to create a vehicle of common expression based on three central tenets: interdisciplinary framework, tendency towards uniform law, and both a theoretical and practical approach. A framework of interdisciplinary nature seems to be relevant as it is desirable to overcome the artificial separation between public and private law.

Legal Aspects of Privately Financed Infrastructure Projects (PFIPs) in China Shuang Liang, 2020-08-01. This book discusses the reform and improvement of Chinese legislation on Privately Financed Infrastructure Projects (PFIPs), the goal being to help its implementation in China satisfy international standards. In this regard, current Chinese laws are found to be insufficient when it comes to reducing risks to PFIPs due to certain shortcomings. Therefore, the corresponding legislation must be reformed and improved. The Legislative Guide and Model Provisions drafted by UNCITRAL are discussed as the international standards that can effectively guide this reform. Other countries' laws on PFIPs provide supplementary reference material. Given the rapid rise in the use of PFIPs in China, this book offers a strong theoretical basis for improving Chinese legislation. It also provides general suggestions that can be applied to the reform of laws on PFIPs in any country.
