Regional Development Theories and Their Application Benjamin Higgins, 2017-07-12 Throughout the world today former nation states as disparate as Yugoslavia, Somalia and Canada have either disintegrated or threaten to splinter into regions. The conflicts are economic, social, ethnic, linguistic, religious, political and cultural. Higgins and Savoie analyze the reasons for these conflicts and show why attempts to eliminate regional disparities within nations have been largely unsuccessful. This volume is a highly readable, comprehensive survey of the literature and current debates in the fields of regional economics, development policy and planning.

Mountain Resorts Julia LeMense, 2016-04-22 Mountains are the home of significant ecological resources: wildlife habitat, higher elevation plant systems, steep slopes, delicate soils and water systems. These resources are subject to very visible and growing pressures, most of which are caused by the unique features of mountains. Using as case studies four mountain resorts in the US and Canada, this book analyzes the extent to which the law protects the ecological systems of mountains from the adverse impacts associated with the development, operation and expansion of resorts. In order to examine these issues, *Mountain Resorts* takes an interdisciplinary approach with contributions from ecologists and lawyers who focus on ski-related activities, increasing four season use of the mountains and expanding residential, commercial and recreational development at the mountains base. Its analysis of an array of US and Canadian federal, state and local laws provides a multifaceted exploration of the intersection of ecology and the law at mountain resorts.
