American Ebola A Deadly Warning For An Unprepared Nation:

American Public Policy Dennis W. Johnson, 2022-09-15 This is a sweeping narrative of American domestic public policy its triumphs struggles and failures over the past 120 years In a larger sense it is a reflection on how the United States has grown and matured faced challenges and opportunities and how its federal leaders and policymakers have responded or failed to confront pressing problems Moreover American Public Policy addresses the hurdles and challenges that still lie ahead Four critical questions are posed and answered First what were the most significant adversities endured by the American people Second what were the landmark domestic policies crafted by the president enacted by Congress or issued in Supreme Court decisions Third what did they fail to do Finally how well have federal policymakers met the key challenges facing America income inequality racism financial crises terrorist attacks climate change gun violence and other pressures And what do we still need to do This book reaches out to students of public policy American government US history and contemporary affairs as well as to citizens journalists and policy practitioners *Unprepared* Andrew Lakoff, 2017-08 A continuous state of readiness The generic biological threat Two regimes of global health Real time biopolitics A fragile assemblage Diagnosing failure Epilogue

Planning for the Wrong Pandemic Andrew Lakoff, 2024-07-09 The fractious and disorganized governmental response to the coronavirus pandemic in the United States prompted many observers to ask why was the country which had the knowledge resources and plans to deal with such an event caught so unprepared Critics pointed to a number of candidates for blame a President who was dismissive of scientific expertise and indifferent to the task of leading government response a fragmented media landscape that enabled misinformation to prosper a slow footed health bureaucracy incapable of flexible response and social disparities that heightened inequities in the impact of disease Planning for the Wrong Pandemic takes a different approach Without dismissing such accounts it begins with the observation that much of the governmental and expert response to the pandemic had been envisioned and planned for in advance Moreover many of these plans were implemented in the early stages of the pandemic As authorities responded to the crisis they relied on an already formulated set of concepts and tools that had been devised for managing a future emergency These pre existing tools enabled officials to make sense of the event and to rapidly implement policies in response But they also led to significant blind spots This book asks under what circumstances were these planning tools developed What did they enable experts officials and the public to see and what did they hide from view And finally as we assess the failures in our response to the pandemic and attempt to prepare for the next one to what extent should we take for granted the capacity of these tools to guide future interventions effectively *TIME The Science of Epidemics* The Editors of TIME, 2016-04-22 TIME s The Science of Epidemics brings deeper understanding of Ebola and other infectious diseases from plague to polio TIME takes readers behind the headlines not only to look at what caused Ebola to spread but how doctors are trying to fight the disease in Africa what the US and other countries are doing to stop it from spreading and the impact it has on survivors and society

TIME looks into the battle against other diseases as well including the campaign in Saudi Arabia against MERS Middle East Respiratory Syndrome and what doctors and scientists are doing to end the AIDS epidemic TIME explores the work of virus hunters in the field report on the new Enterovirus D68 and the ever present and mutating flu virus explain how science won the fight against polio and chronicle the deadliest viruses of all time Filled with the behind the scenes reporting people expect from Time as well as the publication s magnificent photography and informative graphics The Science of Epidemics is a book illuminates what medical researchers and doctors in the field are doing to save millions of lives from deadly diseases

What We Do Next Really Matters Mark Roeder,2022-04-29 The choices we make over the next few years will resonate for decades and perhaps centuries This is because our world is at a critical turning point in history as old certainties are swept aside by a global pandemic climate change and political upheaval How we respond to these challenges will determine whether we usher in a new Age of Enlightenment or a second Dark Ages In this compelling book Mark Roeder makes sense of our predicament and explains why we must reconsider some of our most fundamental beliefs Our current path is not sustainable socially environmentally or economically We are literally devouring our planet and our communities are becoming more polarised and fearful of the future The time has come for us to make some bold changes to the way we live This book explains what these changes should be and how to implement them Adventures in Epidemiology: One

Scientist's Journey Through Disease, Politics, History, and Public Health Dr. W. Sumner Davis, *Democracy and Event* Elaine Stavro,2023-11-24 Catastrophes unsettle our safe places within the world As such they provide an interesting site to analyze the intersection of our affective and political lives Bringing radical democratic thinking affect theory psychoanalysis and discursive analysis to bear on contemporary catastrophic events Democracy and Event presents a fresh perspective on the study of affect and its impact on democratic sensibilities and practices Situated in different countries with differing institutional histories and cultures the Grenfell Tower fire in London England 2017 the SARS epidemic in Toronto Canada 2003 the Parkland shooting in Florida 2018 the early days of the COVID 19 crisis and the murder of George Floyd in Minneapolis USA 2020 Elaine Stavro interprets the rhetoric discourse and affective communication of politicians and passionate protestors She examines their linkages to well established organizations informed by democratic ideals as well as the context in which they arise which have a bearing on their ability to challenge neoliberal and authoritarian practices Inspired by the urgent need to bring theory back to politics and politics back to theory Elaine Stavro demonstrates how theory might inform our attitudes to contemporary events while recognizing that political action and events cannot be captured in their complexity by theory Her skillful engagement with various theoretical approaches read through the lens of catastrophic events will speak to a wide ranging scholarly readership in numerous academic fields Reducing the Threat of Chemical and Biological Weapons United States.
