NETFLIX CASE STUDY

Does Netflix have deep enough pockets to outbid its rivals for broad access to the studios' TV and movie content? Can it convince the studios that it is not a direct competitor?

Netflix has managed to evolve with the ever changing technology industry in such a way that their ability to keep up with the changes in the market, gives Netflix the competitive advantage to stay ahead of the competition such as Walmart and Amazon.com. Today's market is moved by technology where Netflix offers its subscribers the ability to utilize their online movie service virtually on any device from cell phones, tablets, iPods, computers, Blu ray disc players, to game consoles like Xbox 360, PS3 and Nintendo Wii. With the convenience of not having to set foot outside the comfort of their home, a wide variety of movie titles to choose from and with approximately 15 billion subscribers paying a monthly service fee ranging from \$8.99 to \$47.99, Netflix has the business model and numbers to revolutionize the movie rental business while continuing to provide better services than the competition. Netflix reported revenues of 3.61 billion in 2012, numbers that definitely give them deep enough pockets to outbid its rivals for broad access to studio TV and movie content. Netflix can convince studios just by demonstrating how their 2009 partnership with Vizio & LG as well as the one with Google TV in 2010 can be of more profit to both companies than competing against each other.

How much time should Hastings and his executive team devote directly to hiring? Should he and his executive team be directly involved, or is this something that he should delegate?

The time I would devote to hiring may vary depending on each individual situation but most definitely I would plan ahead and have a system set up in order to ensure the most effective process in assessing each individual considered for hiring. The hiring process is something that should be delegated and done through human resource which in turn will ensure a thorough background check on possible candidates in hopes of selecting efficiently.

What could be provided in way of pay, perks and company culture that will attract, inspire and motivate top talent to achieve organizational goals?

I would consider offering a more relaxed and enjoyable environment where my employees would feel they have control of their time rather than feel they have someone watching over their every move. This would lead them to have a sense of trust coming from top management. Set up a system where every employee has the opportunity to share their

Predictive AI Astrology for Business 2025 Now **Beyond the Boardroom** Dr. Piali Haldar, Dr. Brijlal Malik, 2025-06-19

The book *Beyond the Boardroom Practical Management Cases in Indian Context* is a timely and valuable contribution to the field of management education and practice in India. As management education is continuously evolving in a competitive environment, there is a growing need for resources that go beyond theoretical frameworks and provide real-world insights into decision making, problem solving, and leadership. This edited volume responds to that need by offering a comprehensive collection of 100 carefully selected and well-structured case studies drawn from the Indian business environment. By blending theory with practice, the book bridges the gap between classroom learning and the complex realities faced by managers and organisations in diverse industries. At its core, the book recognises the importance of contextualising management knowledge. Much of management literature historically has been dominated by Western perspectives and examples. While global theories provide a strong foundation, management students and practitioners in India often struggle to connect them with the unique socio-cultural, economic, political, and legal environment of Indian businesses. It examines how Indian companies, both large corporations and emerging start-ups, navigate challenges and opportunities while responding to the local environment. Such an approach not only enhances the relevance of management education in India but also encourages learners to appreciate the nuances of decision making in emerging economies. The case studies cover a wide spectrum of management disciplines, ensuring that readers gain a holistic perspective. In the area of Marketing, the book spans both traditional marketing practices and digital marketing strategies, reflecting the transformation Indian businesses are undergoing in reaching consumers. In the field of Human Resource Management (HRM), the book explores cases on talent acquisition, workforce diversity, performance appraisal, and employee engagement. The Finance section includes case studies that shed light on capital structuring, investment decisions, risk management, and financial planning within Indian businesses. Strategic Management and Policy form another significant focus of the book. The cases under this domain explore mergers and acquisitions in the Indian corporate sector, the impact of globalization on domestic firms, and the strategies adopted by organisations to remain competitive in highly dynamic markets. The General Management and Operations section deals with the day-to-day challenges that managers encounter. Cases in this area cover topics such as supply chain disruptions, quality management, lean operations, project management, and customer relationship management. One of the strengths of this book is its interdisciplinary nature. By offering cases that cut across multiple functions, it highlights the interconnectedness of business decisions. Through these interlinkages, the book encourages readers to adopt a holistic mindset and view management problems not in isolation but as part of an integrated system. For educators, the book serves as an invaluable teaching aid. The case method of learning, which has long been recognised as an effective pedagogical tool, allows students to engage actively with real scenarios, debate alternative courses of action, and develop problem-solving skills. With 100 diverse cases, instructors have ample material to design course modules, assign group discussions, and encourage applied research.

The richness and variety of cases ensure that the book can be used across undergraduate postgraduate and executive education programs For students the book provides an opportunity to sharpen analytical decision making and leadership skills By situating cases within the Indian business environment it fosters a sense of relevance and relatability Students not only learn theoretical concepts but also witness how those concepts manifest in real organisations This prepares them to become managers who can adapt theory to practice with confidence In conclusion Beyond the Boardroom Practical Management Cases in Indian Context is more than just a collection of case studies it is a comprehensive learning resource that reflects the vibrancy and complexity of Indian business By covering all major management disciplines Marketing Digital Marketing HR Finance Strategic Management General Management and Operations the book provides a 360 degree view of organisational challenges For academicians students and practitioners alike this book is an essential companion in the journey of bridging theory and practice in management education
